Pat" - Entire Program High Class and Well Presented.

The entertainment for St. Patrick's eve as announced in the last issue of The Gazette-Times, was carried out before a large crowd at the Star theater on Tuesday evening, in a very successful manner.

The first part of the program consisted of a short address by Father P. J. O'Rourke in which he extolled the Irish people for their fealty to the home land and their patriotism to their adopted country, and this was followed by musical numbers and recitations, all splendidly rendered and well received.

Miss Margaret O'Rourke appeared in both song and recitation and demonstrated her ability as an entertainer in both lines.

Little Miss Kathleen Monahan, who appeared before Heppner audiences before, sang "Let Erin Remember" in a pleasing manner, and responded with an encore. She is a bewitching brown-haired miss, and in her simple and unaffected manner always wins the audiences.

E. L. Berry made a "hit" with his recitation, "The Two Pictures," and he no doubt will be called upon for further performances.

Miss Marie Hager sang "Asthore" in a beautiful manner and had to answer to an encore. Rev. B. O'Callaghan, of Hermis-

ton, who possesses a pleasing baritone voice, sang "Mother Machree." putting much feeling into the rendition of this pretty Irish melody, and his response to the encore was "The Shamrock."

Mrs. L. K. Harlan and Miss Katherine Clark, in vocal duet, "The Land of the Swallows" delighted the audience. These ladies possess very sweet voices and they sing well together. Miss Clark possessing an especially well developed and mellow They responded with soprano. 'Kathleen Mavourneen."

Part second of the program was the presentation of the laughable farce, "That Rascal Pat." Billy O'-Rourke was the "rascal" and he sustained his reputation well-in fact he almost established a new reputation for himself. He fell into much difficulty but finally extricated himself and saved what little reputation he had left. His title was "Pat Me-Noggerty." a name that might well be associated with a blundering ser-
