Michael Pendergast, who is in the Heppner Sanatorium suffering from an attack of pneumonia, is improving. Mr. Pendergast has a wife and two children in Colorado, where he was formerly employed in the mines. As he is almost without funds, he worries about his family a great deal. He was thrown out of work at the mines on account of the strike, and at the time he took sick, was working down in the Sand country, where Father O'Rourke found him and brought him to the hospital at Heppner. The county has taken up the case, believing it to be one well worthy of attention.

Kenton Rakes, the black horse farmer, was in town Tuesday. He was accompanied by his father-in-law, T. D. Estleford, who has just arrived from O'Neil, Nebraska. Mr. Estleford likes our country very much and may decide to locate here permanently. He notes quite a difference in climatic conditions here to what they were when he left his state. They had a very severe winter in Nebraska and lots of snow, which had not entirely disappeared when Mr. Estleford left there.

Two families by the name of Anderson arrived in Lexington last week and have settled on what is known as the Atkinson place situated near South Springs. They brought a car load of stock, farm implements and household goods, and chickens for their new home. They are from Gresham, Oregon. We hope more of such people will follow.

A good roads meeting was held in Lexington Saturday afternoon and a large number of people interested were in attendance. A number of county officials were also present to learn the wishes and obtain the opinions of the people in regard to the improvement of roads in this road district. It is a good time for such meetings and the opinions of people who have long been residents of this vicinity should give the officials the true condition and a proper basis to work upon. It is hoped more meetings of this kind will be held from time to time and good results will be obtained from them.

From the Social Ridge country south of Lexington comes many reports that the cut worms are doing much damage to the growing grain. It may be army worm or wire worm, or whatever you may have a mind to call it, but its destruction of the fall grain has caused many farmers to reseed at this late date. The ground has been so cold that it causes the worms to work nearer the surface where it is warmer. As the ground becomes warmer the worms are driven deeper in the ground and below the roots of the growing grain where they can do no damage. It is to be hoped some means will be devised to combat this pest in the near future.
