Don't fail to consult them about your eyes and glasses. Lenses do not wear out, but eyes do. Every part of the body changes with advancing years, and the eyes in common with the rest of our physical being show the effect of age. We must therefore meet the changed condition of the eyes. The glasses that you bought two or three years ago are not giving your eyes the proper assistance. As your eyes are wearing out year by year your lenses should be changed to correspond with your changing vision. Come and let us talk it over with you. Don't forget the date.
