**KRYPTOK
LENSES**

(Worn by over 250,000 people)
For all other two-vision lenses
there is a line or seam between
the near and far vision portions
that makes the wearer look less
than his best, and unmistakably
brands him or her with a sign
of age.
Kryptoks are double-vision lenses
that look exactly like regular one-
vision lenses because there are
no lines or seams in them.

What Are YOU Worth From the NECK UP?

It is estimated that
the average man is
worth \$1 a day from
the neck down—what
is he worth from the
neck up?
That depends en-
tirely upon training.
If you are trained so
that you plan and
direct work you are
worth ten times as
much as the man
who can work only
under orders.
The International
Correspondence Schools
go to the man who is
struggling along on
small pay and say to
him, "We will train
you for promotion
right where you are,
or we will qualify
you to take up a

**S. W. Wattenburger Loses Home in
Fire.**

Word comes in from McKay creek
that S. W. Wattenburger, a well
known rancher of that vicinity, lost
his home and all of the family house-
hold possessions last Thursday by
fire. The fire was caused by his lit-
tle three year old daughter who was
playing with matches. She struck
matches in a clothes closet and set
the clothing on fire. Before it was
discovered the whole house was in
flames and nothing could be done to
check them.—Pendleton E. O.

State University Will Give Roses.

University of Oregon, Eugene, Dec.
13.—Four thousand Frau Karl Drus-
chki rose slips, rooted and growing,
are to be given away this college year
to the four-year high schools of the
state by the University of Oregon.

The plants are to be set out on the
high school grounds and cared for.

Any time after the first of Janu-
ary, the desired number of slips—
from 12 to 20—will be shipped pre-
paid on the request of the high school
principal, the chairman of the board,
or the president of the student body.

The requests will be filed and filled
in order of receipt, but some of the
eastern Oregon shipments will be
held up until after the hard freezes.

H. M. Fisher, superintendent of
the University grounds, says that the
roses are a uniformly hard and vig-
orous variety. The two-hundred foot
hedge from which the slips are cut is
even now full of large white buds.

Most of the 1600 cuttings sent out
last year grew, Mr. Fisher says. It
was the first time the offer had been
made, and there were more requests
than could be filled. Even the grade
schools began asking for them. Mr.
Fisher says that by close trimming
the parent hedge could furnish as
many as 10,000 slips, so prolific is it.

The only receipt asked by the ex-
tension division of the University,
through which application for the
cuttings should be made, is acknowl-
edgement through the local paper.
