For in all other two-vision lenses there is a line or seam between the near and far vision portions that makes the wearer look less than his best, and unmistakably brands him or her with a sign of age.

These animals had wintered in that country and had been left there about a month too long, according to Mr. Ingalls, since snow has covered the ground there for many weeks and as the horses were depending upon grass for feed they had little or nothing but pine needles to eat.

Anyone who thinks the present weather is bad should look back to the winter of 1883 when there was five feet of snow on the ground and no trains passed through Echo for more than 20 days. Oldtimers say that the year when loss of livestock was the greatest was 1889. That season there was snow and cold weather in January followed by a snow in March. Most of the stock in the county was killed.—Echo News.

What Are YOU Worth From the NECK UP?

It is estimated that the average man is worth \$2 a day from the neck down—what is he worth from the neck up?

That depends entirely upon training. If you are trained so that you plan and direct work you are worth ten times as much as the man who can work only under orders.

The International Correspondence Schools go to the man who is struggling along on small pay and say to him, "We will train you for promotion right where you are, or we will qualify you to take up a more congenial line of work at a much higher salary."

Every month several hundred students voluntarily report advancement as the direct result of I. C. S. training. You need not leave your present work, or your own home. Mark this coupon at once and mail it.
