When you need two-vision lenses—be sure to get **KRYPTOK LENSES** (Worn by over 250,000 people) For in all other two-vision lenses there is a line or seam between the near and far vision portions that makes the wearer look less than his best, and unmistakably brands him or her with a sign of age. Kryptoks are double-vision lenses that look exactly like regular one-vision lenses because there are no lines or seams in them.

HEAR WITHOUT EARS

Police and Detectives Are Using Lip Reading in Place of the Dictagraph.

Thousands of deaf people are today throwing away all hearing devices and are enjoying all conversation. This method is easily and quickly acquired thru our system. Absolutely the only thing of its kind in the country. Our proposition is entirely original. We guarantee results, it will amaze you. Cost is trifling. See what New International Encyclopedia says on Lip Reading. Hundreds of people with normal hearing are taking up Lip Reading for the many additional benefits gained. You can understand what the actors are saying in the moving pictures. You can understand what people are saying just as far away as you can see them. The eye understands beyond the range of hearing. Send no money, but mention this paper and state whether or not you are deaf. All particulars will be sent you absolutely free and with no expense to you. Address, School of Lip Language, Kansas City, Missouri.
