

## Advance in Prices OF Studebaker Cars

On or about December 1st, the prices of Studebaker cars--both the FOUR and the SIX--will be advanced from \$75 to \$100 over prevailing prices.

IN THE FACE OF THE RAPID INCREASE IN THE COST OF RAW MATERIALS ENTERING INTO THE CONSTRUCTION OF STUDEBAKER CARS, PRESENT PRICES HAVE BEEN MAINTAINED. BUT NOW CONDITIONS IN THE INDUSTRY HAVE REACHED A POINT WHERE STUDEBAKER IS FORCED TO ADD A SUBSTANTIAL INCREASE TO THESE PRICES.

For the past eighteen months there have been rapid advances in the cost of all raw materials entering into the manufacture of automobiles--especially on steel of all kinds, pig iron, castings, stampings, sheet metal, aluminum, leather and upholstering materials. And these advances range all the way from 40 to 150 percent.

Studebaker has always been satisfied with a small margin of profit--and you may rest assured that, even with a substantial increase over prevailing prices both the FOUR and the SIX will still be the most powerful seven-passenger cars in the world at their prices. And you will still have to pay from \$300 to \$600 more to equal them in power, roominess, economy, beauty of design, and all-round dependability.

Our allotment of Studebaker cars at the present prices is very limited and is likely to be exhausted at any time. So if you want to save from \$75 to \$100, we urge you to come in at once.

Mrs. Bernie Gaunt recently underwent a serious operation at the Heppner Sanatorium. Her condition at this time is reported improved.

Mrs. C. C. Chick of Ione has gone to Portland to spend a week in shopping and visiting during the holidays.

Bruce Dennis, former LaGrande newspaper man, is spending the day in Heppner on business.

Henry Neel of Lone Rock spent several days in this city on business the past week.

Mrs. S. F. Moore of Ione was a visitor in Heppner today.

Clive Huston, Eight Mile farmer, was in the city today. He reports serious loss in the potato crop to farmers in this section on account of the severe weather. Although the potatoes for the most part have been dug, they were not recovered deep enough to prevent freezing.
