Mrs. Celsus Keithley has engaged in the sheep business at the Keithley farm below town, and is raising a bunch of lambs on the bottle. The youngsters are doing well, even though they do require pretty constant attention, and they will grow into money rapidly. A contrivance for their nursing has been fixed up by using a barrel in which a number of holes have been bored sufficiently large to allow the insertion of the neck of a bottle and his royal lamblots can step up, take hold of the nipple, wag his tail and receive his "feed" just as well as though he was being looked after by his natural mammy. Mrs. Keithley expects to be rated as one of our chief sheepraisers before long; at least she is going to be in the swim with a bunch of lambs that is a fine start in that direction.
