The Phonograph which Really Sings

There are many kinds of talking machines and sound reproducing machines, but there is only one instrument that really sings; the rest of them give an imitation of singing, just as you or I might give an imitation of a dog barking.

The NEW EDISON "The Phonograph with a Soul"

actually sings. It has stood beside Marie Rapold, Anna Case, Margaret Matzenauer, Giovanni Zenatello, Guido Ciccolini, Jacques Urus, Arthur Middleton, Thomas Chalmers, and a score of other great artists, and has sung duets with them and then sung in comparison with them. The music critics of five hundred of America's principal newspapers concede in the columns of their own papers that it is only by watching the lips of the flesh-and-blood artists that they can tell whether it is the artist singing or the New Edison singing.

MAKE US PROVE OUR STATEMENTS

We almost hope that you will disbelieve what we say. If you question our word, please do us

the justice to come into our store and give us a chance to prove that the New Edison does all we claim for it.

You will not be asked to buy. We are satisfied if we can convert you as fully as the music critics of America's principal newspapers have been converted.

Notice—Please do not ask us to sell you Edison Re-Creations if you intend to attempt to play them on any other instrument than the New Edison. No other instrument can bring out the true musical quality of Edison Re-Creations. Furthermore, injury to the records is likely to result if you attempt to play them on an ordinary phonograph or talking machine.
