

IT STARTS MONDAY

NEW PERFECTION OIL COOK STOVE Week

The orange discs which you will see displayed next week in the windows of the dealers listed below bring a welcome message—a message telling of relief from the drudgery and discomfort of summer cooking.

For the New Perfection cooks better than any wood or coal range, and it does not heat up the kitchen. Cooler cooking in summer—more economical cooking all the year 'round.

Watch for the orange discs next week. Ask any of these dealers to tell you about the New Perfection Oil Cook-Stove and how the long blue chimneys prevent all smoke and smell.

Grain Grading School Success.

The first grain grading school ever held in the United States has been concluded at the Oregon Agricultural College with such success that the work will be continued in a series of extension courses held in various parts of the State by the Extension Service. The school was designed to enable farmers, millers and grain dealers to determine the weights and grades of all northwest wheats, so that the milling and marketing values can be ascertained before the grain is sent to market.

The school just concluded showed that wheat men can readily learn the classes into which any local-grown samples fall, and that after classification the placing into grades is a simple matter. It also developed that most of the important wheats grown in the Pacific Northwest are cared for in the federal grain standardization rules, and all samples thus covered are given ratings according to the Federal standards. A few classes fall outside the Federal classes, and these will be taken up at joint hearings before the public service commissions of Oregon and Washington, at which equitable classifications will be made. These hearings will be held as follows: Portland, June 18; Tacoma, June 19; Spokane, June 20; and Pendleton, June 21.

The extension courses will be given by G. R. Hyslop, professor of Farm Crops at the College, who will also attend the joint hearings and assist in determining grades.
