CHEERFUL WORDS

For Many a Heppner Household.

To have the pains and aches of a bad back removed—to be entirely free from annoying, dangerous urinary disorders, is enough to make any kidney sufferer grateful. The following advice of one who has suffered will prove helpful to hundreds of Heppner readers.

I. R. Esteb, Heppner, says: "I am a strong believer in Doan's Kidney Pills and whenever I can recommend them to others, I don't hesitate to do so, for I know they can't be beat. Whenever I feel in need of a kidney medicine, I get a box of Doan's Kidney Pills from Humphreys Drug Co., and in a few days the pain in my back is relieved and my kidneys become normal."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Esteb had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

With this new instrument there is no guessing. It measures and registers the defect absolutely correct.

True Americanism and National Thrift Day

PATRIOTISM is not alone for our stalwart sons who are manning the guns which roar out Liberty's challenge.

It is, as well, for all Americans—the people behind the line.

We must consume less; produce more; see that our vast resources are concentrated upon the winning of the war.

We must all do our best. Let us begin on National Thrift Day, February 3rd-4th—the time for starting of new Thrift habits and for opening or adding to bank accounts.

JUST WHAT DOES THE EDISON TONE TEST DEMONSTRATE?

THIS is an effort to explain in simple lucid language exactly what the Edison tone test demonstrates. When you have read it we want you to have as clear an idea of just what the test signifies as though you personally had witnessed one.

We have repeatedly asserted that in the New Edison the great inventor had perfected a device which Re-Creates the artist's voice with such complete fidelity that no human ear can detect the slightest shade of difference between the living artist and the inanimate instrument. The tone test is conducted merely for the purpose of proving the truth of this statement.

The demonstration is simple in the extreme. The instrument is placed upon the stage; an artist stands beside it. The instrument begins to render one of the singer's own songs. After a few moments the artist begins to sing the same song with the instrument. Suddenly the singer ceases and the New Edison continues alone. Can you distinguish the difference? That is the question.

Over 1500 of these tone tests have been staged. Over 30 great stars: Anna Case, Marie Rappold, Marie Sundellus, Alice Verlet, Thomas Chalmers, Arthur Middleton, Giovanni Zenatello and others of similar eminence have participated in them. Of the more than 2,000,000 people who have been present not one has been able to detect any difference between artist and instrument: between a singer's living voice and the New Edison's Re-Creation of it. With the lights lowered to hide the singer's

lips not one of the 2,000,000 has been able to say when the singer ceased and the instrument continued alone.

In plain, everyday English the foregoing is a description of an Edison tone test. These tests have convinced more than 2,000,000 people that Thomas A. Edison

has achieved what was believed to be impossible. We are publishing this not only to convince you of the truth of our assertions about this incredible instrument but also to urge you to call at our store and learn for yourself what we mean by the phrase "Music's Re-Creation."
