Sugar Rations Reduced.
 Heretofore, the tables in the dining room at the Palace hotel carried bowls well filled with sugar, and the patrons were not restricted in the use of sweetening. Now, however, in carrying out the suggestions of the state food administrator, Manager Wilkins has removed the sugar bowls and hereafter each patron must be contented with two cubes of sugar for his coffee. This is a plan that is being put in force throughout the country for the conservation of sugar.

GASOLINE SUPPLY IS AMPLE FOR ALL CARS

Sales Manager of Chandler Company Cites Facts of Gas Production in Letter to Distributer.

"In view of the statements by A. C. Bedford, chairman of the Petroleum War Service Committee, our gasoline supply is ample for all purposes and the reserve stock is accumulating so rapidly that storage facilities are being taxed to the utmost.

"As outlined in a recent report by the National Automobile Chamber of Commerce gasoline is so plentiful that officials at Washington have recommended its more generous use, so that there may be no difficulty about the Government obtaining its fuel supply, which comes only after gasoline is taken from the crude," states James M. Dunlap, sales manager of the Chandler Motor Car Company, Cleveland, Ohio, in a letter to Martin Reid, local Chandler distributor.

"The Government must have a continuous and ample supply of fuel oil for the many uses of the navy, merchant ships, munitions factories and other industrial plants," continues Mr. Dunlap, "and, as gasoline is in the nature of a by-product of fuel oil, it is unreasonable to even think of a gasoline shortage.

"The Bureau of Mines reports our gasoline production at 6,849,000 gallons a day, while our war needs are only 959,000 gallons.
 "Just consider it—nearly seven millions of gallons a day! And, with insistent demands by the government for more fuel oil, even this tremendous production will probably be increased."
