Drawn from a photograph of Christine Miller singing in direct comparison with the New Edison and proving that the two interpretations are identical.

A Faithful Reflection of Christine Miller

Just as the clear surface of a quiet pool mirrors the image above it so does this marvelous instrument reflect with complete fidelity the voices of the Edison artists. So perfect and satisfying are the Re-Creations that no human ear can detect a shade of difference between the performances of the artists and those of

The NEW EDISON

Over two million people have attended our famous tone tests in which the artist was pitted against the instrument. And not once has the New Edison failed to meet this searching test: definitely—convincingly—conclusively.
