ENGINEERS PERFORM GREAT WORK IN FRANCE

Washington, D. C., March 27.—Secretary of War, Baker, has just reviewed with commendation the great work that has been done by the United States Engineering Army at the entrance port in France for our expeditionary forces. In the last six months these troops have transformed what was then an insignificant shipping point with facilities for only a half dozen vessels into a harbor that rivals the greatest American port.

Forty millions of dollars worth of machinery and materials were placed in the hands of the American Engineers. They dredged the shallow channel and made a deep waterway. The dredging filled in the marshes. These were covered with miles of piers and warehouses. Now sixty steamers can load and discharge their cargoes simultaneously. The eastern end of General Pershing's bridge of ships is built.

The largest railroad yard in all France has made the war zone tributary to this port. Miles of switches and hundreds of train crews are busy handling the food and supplies for the boys at the front. Shops and roundhouses are ready to keep the rolling stock in good repair.

Many battalions of Engineers were required to build this distributing center in so short a time. Carpenters, bridge builders, pile drivers, machinists, concrete workers, structural steel workers, riggers, surveyors, dredgers, dock helpers, railroad operators, trackmen, cooks and general utility men all helped to complete this military task.

This new harbor was planned and the improvements were all made by the Engineering soldiers. The Engineers are the pioneers of the army. They make the way possible for the advance of the Infantry and Artillery. They are the skilled workmen of the army. The First Replacement Regiment of Engineers, stationed at Washington Barracks, D. C., trains men for the different organizations of the United States Engineers.

The personnel of units in the Engineering Army is similar to that of an industrial organization. Each man in the army applies his technical knowledge to solving military problems. A soldier can follow his chosen profession in the army as well as the man in the industrial world.

Performance the Greatest Oakland Virtue

The owner of an Oakland Sensible Six never fears to put his car in competition with another.

He knows that the car he drives is equal to any demand he may put upon it—that performance is its greatest virtue.

The high-speed overhead-valve engine of this Oakland Sensible Six delivers at 2600 r. p. m. one full horsepower to every 48 pounds of car weight.

No motor in the world carries less weight per horsepower than this—none is spryer, more efficient, more saving.

With a speed range of from 1 to 55 miles an hour and a trigger-quick acceleration, it is still very economical.

It delivers from 18 to 25 miles on every gallon of gasoline, and its even power draws the greatest possible mileage from the Oakland's oversize tires.

We know you will like this new Oakland—for its comfort, its ability and its value. The price is \$1200.

The Gazette-Times

Makes Clubbing Arrangement With
The Oregon Farmer
Offers Unusual Opportunity to its Readers

AMONG our large circle of readers there are a great many who are interested directly and indirectly in fruit growing, dairying and other branches of farming. All of these naturally wish to keep in close touch with agricultural activities throughout the state; and to know about any fight which is being waged for the measures Oregon farmers want and against all sorts of schemes that are detrimental to the people and agricultural interests of this state.

We have, therefore, made a special clubbing arrangement with THE OREGON FARMER whereby any farmer or fruit-grower, who is one of our regular subscribers and who is not now a subscriber to THE OREGON FARMER, will be entitled to receive THE OREGON FARMER in combination with this paper at the same rate as for this paper alone.

This offer applies to all those who renew or extend their subscriptions as well as to all new subscribers. If you are interested directly or indirectly in Oregon agriculture, do not miss this unusual opportunity, but send your order in now.

THE OREGON FARMER is the one farm paper which is devoting itself exclusively to the farming activities and interests of Oregon. It has a big organization gathering the news of importance to farmers, dairymen, fruitgrowers, stockraisers and poultrymen; and it has the backbone to attack wrongful methods and combinations and bad legislation, and support honest leaders and beneficial measures. We are confident that our readers will congratulate us on our being able to make this splendid and attractive clubbing offer.
