FARMERS UNITE FOR SERVICE

DRIVE TO EXTERMINATE SQUIRRELS IS ON.

(F. R. Brown, County Agent.)
Each new war drive and the ever increasing tendency to speed up all lines of endeavor, emphasizes again and again the necessity for more complete organization of all forces that are working for the winning of the war and that means that all forces must work together if delays, lost time and wasted efforts are to be avoided.

Through the Morrow County Agricultural Council there are being built up community committees which by cooperating with each other will increase the production of food with the least increase of effort and by cooperating with the County Council of Defense will be of great assistance in making that work effective. These local community committees are being formed for the purpose of co-ordinating all efforts put forth in the interest of the community.

Doing His Bit To Help Lick The Kaiser.

Guy Huston, Eight Mile farmer, tells a story on his young son, about seven years of age, which illustrates how earnestly the youngsters of America are entering into the war spirit. Mr. Huston had taken his team out into the field where he was seeding, but before hitching up was called off to another point by a neighbor. He left the team standing in charge of his little son, who was with him at the time. Mr. Huston said he was not gone very long, but when he returned the boy, the team and the drill had all disappeared. He became somewhat anxious and started out hurriedly to find what had happened. Soon he came upon the whole outfit. The boy had hitched up the team and was proudly going on with his father's work. The youngster is imbued with the idea of food production. He took the initiative. This is the spirit you will find in the younger generations and its spirit that is going to help mightily in winning the war.
