HAS FINE NEW BARN AND IS MIGHTY PROUD OF THE HANDSOME STRUCTURE

A. REANEY, AT LEXINGTON, KEEPS UP WITH THE VAN IN IMPROVEMENTS--SOME OTHER ITEMS OF INTEREST FROM OUR NEAR NEIGHBOR.

A representative of this paper had the pleasure, through the kindness of Lou Holmes, Tum-A-Lum man at Lexington, of making a visit to the A. Reaney place just below that city on Tuesday and taking a critical squint at the new barn Mr. Reaney has but recently completed. Mr. Holmes is naturally somewhat proud of the building, as is also Mr. Reaney, for the barn was constructed from plans furnished by the lumber company, after they had secured the ideas of Mr. Reaney. The barn is 40 x 46, 16 feet to eaves and capped with a full trussed roof. The entire structure rests upon solid concrete to which the barn is securely bolted, and nothing short of a regular "Missouri twister" will ever be able to jar it loose. The stall room accommodates 16 head of horses and these are arranged on either side of a spacious driveway, while on the lower floor is a sleeping room, harness room and granary, sufficient to hold 400 bushels of grain. The mow overhead will care for 50 tons of hay. We were struck with the substantial and neat, sanitary structure of the building and congratulate Mr. Reaney on the good judgment shown in putting up such a barn for the care of his horses. He spent \$1850 as a total cost and the construction work was done under the supervision of Walter Gerard, a builder living near Lexington. Mr. Reaney has other improvements in contemplation and expects before a great while to put up a commodious shed for the storing of farm machinery.

Quits Barbering for Homestead.
J. B. Coxen, who has been conducting the barber shop at Lexington for several years, has leased the shop to C. J. Stevens of Forest Grove, and Mr. Stevens will arrive the last of this week to take charge. Mr. Coxen has already moved to his homestead which is near the Blahm place just below Heppner. He will undertake chicken raising and do small farming for the present, hoping to be able later on to add to his holdings and spread out on a larger scale. The confinement of indoor work was the factor that induced Mr. Coxen to take to the farm.

Church May Construct New Home.
The Christian church organization of Lexington is contemplating very seriously the construction of a new church building in the near future. They own a nice building lot, the property formerly owned by the Lexington creamery, and we understand that plans are being prepared for a church that will cost around \$5000 and be quite modern in every respect. However, definite steps have not yet been taken toward a new building as negotiations are pending for the purchase of the Southern Methodist property. Should the latter move materialize, the money, or at least part of it, that would be used in the construction of a new building, will be used in remodeling this meeting house. Just what will be done in this particular will be settled before a great while. In the meantime the church is looking forward to the locating of a new pastor. They will have services in the M. E. Church South on Sunday morning next, Guy Dill, of Eugene having charge. Mr. Dill will also preach in the evening for the church at Ione.

Is Erecting Modern Barn.
Alfred Nelson, a successful farmer living a few miles northwest of Lexington, is beginning construction of a new modern barn for the care of his farm stock. The structure will be 56x60 and when completed will be a valuable addition to the improvements on the Nelson farm. Mr. Nelson can be said to be one of the most successful young farmers of the north Lexington section. He came to Morrow county about ten years ago and for a time tried farming in

Swede Canyon along with Pete Christenson and for several years had a pretty tough time of it. In the fall of 1915 he located on his present home as a rector. Meeting with better success he concluded to buy the place and has since added to his holdings until now he is the owner of 1120 acres and is practically out of debt. The larger portion of the Nelson farm is the old Davy Parkins place and is situated across the "dead line" on the north side of the Base line in a section of the country long since condemned for farming purposes, yet in this short time, by using the right methods and not being afraid to do good work, Mr. Nelson has come to the front and is making one of the best farms in the country. He went on the land without anything but a willingness to work. He was observant of the good methods used by his near neighbors and applied these in his own business and his success is well deserved. What Mr. Nelson has done in that locality can be done by others if they will give the same attention to their business, and by so doing a portion of the country that has long been thought very poor for farming will come rapidly to the front.

To Store Distillate.
Beach & Scott are putting in a 560-gallon storage tank for distillate. The tank will be buried on the hill above the garage and a pipe will lead from this to a tap near the garage, giving pressure sufficient so that small tanks may be loaded in the wagons and thus save a lot of lifting. They will be prepared to care for the needs of farmers by having a sufficient amount of distillate in storage, and also save the use of smaller tanks which the oil company reports are getting scarcer every day.

Receives New Issue Liberty Bonds.
Lexington State Bank this week received \$6500 worth of the new bonds of the Third Liberty Loan, being the amount of the cash subscriptions in the recent drive. Cashier Hill is of the opinion that the greater portion of the Lexington subscriptions will be paid in full on the day the first installment is due and but few will likely take advantage of the full time allowed by the government in which to make payments. Lexington has gone over the top in all drives to date and can be depended on to measure up for all future occasions.

Pioneer Resident Quite Ill.
J. M. White, pioneer resident of Lexington, returned home on Sunday from a stay of three weeks in Portland, where he had been under the care of a specialist. We did not learn just what ailment Mr. White is suffering with, other than an apparent general breakdown. His physician has suggested a rest treatment for Mr. White and his many friends hope that ere long he will regain his former good health.

B. F. Swaggart, who recently invested in a new Hupmobile, is constructing a garage for the same on his farm.

E. J. Starkey, Heppner electrician, was in Lexington a few days the first of the week, wiring the new McMillan cottage.

Charley Pointer recently finished up an addition to his residence property near Lexington, the same being an extension to the kitchen.

W. P. McMillan, who recently purchased the Coxen residence property, is making an addition to the same which will cause an outlay of some \$500.

W. H. Padberg took about 120 head of his cows and calves to the Neal White place, north of Lexington, Tuesday, where they will be pastured during the summer on range that he has secured in that vi-

city. The stock was in excellent shape.

C. T. Davis has charge of the work of constructing a new 20,000-gallon cistern on the farm of McMillan Bros. west of Lexington. When this job is completed, he will put in a cistern on the farm of Mrs. E. J. McAllister. This will be of about 10,000-gallons capacity.

C. A. Johnson is contemplating a new residence and has the foundation in. At the present he is working with one of the shearing crews in the north end of the county and expects to commence work on the superstructure of his residence when the shearing season is over.

The City Ditch Company, composed of a number of Lexington's leading citizens, are busy at the present time laying a lot of new flume for their irrigation ditch. Willow creek is tapped near the east side of the Norwayke place and the water is carried into town to be used in irrigating gardens and lawns, taking care of the most of the east side of the city.

Mr. and Mrs. R. A. Nichols, of Walla Walla visited with relatives and friends at Lexington over the week-end. They were guests at the home of Mr. Nichols' mother, Mrs. E. Thompson. They came over by auto and returned to their home on Tuesday. Mr. Nichols was formerly engaged in business in Lexington, being associated with Leach Bros.

A new bridge will be put in across Willow creek by the railroad company. The timbers are on the ground and the pile driver is expected any day to place the piling. The bridge will be a clear span over the creek and the channel will thus be left free from danger of choking by the lodgment of debris against the piling in the middle of the stream as heretofore.

The shearers at the Jim Carty place at Tub Springs have finished their work and 90 sacks of Carty wool are now stored in the Leach & Scott warehouse at Lexington. John Curran is also finishing up his shearing and the wool will be drawn to the same warehouse shortly. Ed Kellogg, of Heppner is doing the hauling with his big truck, bringing in wool and taking out slab wood.

Stacy Roberts House Burns at Hardman.

The Stacy Roberts residence at Hardman burned to the ground last Monday. Reports received in this city by Mr. Roberts did not state, if it was known, how the fire started. The house was occupied at the time by Mr. and Mrs. Clair Ashbaugh and some people by the name of Hayes. No one was injured, but all the new furniture recently placed in the house by Mr. Ashbaugh, was destroyed. Mr. Roberts places his loss at \$2000, of which one half was covered by insurance.

Another Morrow County Boy in France.

Among the letters from Oregon soldiers recently published in the Sunday Journal we note that of Douglas Becker, a former Morrow county boy. Becker, who is a foster son of Mrs. Laura Ward of 6013 48th St., Portland, resided in Hardman for many years and attended Benson Polytechnic School in Portland. He will be remembered as the boy whose miniature aeroplane received much favorable comment at the second Morrow County Fair. He has been in the army more than a year and in France about two months.

He reports a pleasant trip across the "pond" and is well pleased with army life in France, but considers European methods far behind those of America. For the benefit of any friends who would care to gladden the heart of a "Sammie" with a letter, the address is, 6th Batry, F. A. R. R. Depot Div., A. E. F., France.

Standard Oil Company Gives Advertising Space To Liberty Loan.

During all next week the Standard Oil Company will contribute all the space that would otherwise be used for advertising Zerolene lubricating oil to pushing the Third Liberty Loan. Beginning next Monday the final drive to sell Liberty Bonds will be on and everybody will work to the utmost to help the Government make the Loan an overwhelming success.

No pains will be spared by either individuals or business firms and the Standard Oil Company is in the forefront in the patriotic move to concentrate every effort to give the Pacific Coast the lead over other sections of the country.

All contracts for advertising Zerolene in the press will be turned to pushing the sale of Third Liberty Loan Bonds.

Striving For Meat Production.

J. D. French of Gardane and John Brosnan of Lena were business visitors in Heppner the last of the week. These men are associated in the stock business and doing their bit to increase the meat supply, as they have on their various ranges at the present time some 1600 head of cattle which they are conditioning for market. A large part of their stock wintered in the vicinity of Heppner. These men bought considerable hay last fall and owing to the short feeding season during the winter, had some left, which they are threshing out.

"A GOOD MAN TO WORK FOR IS A GOOD MAN TO VOTE FOR."
A SLOGAN chosen by the many men who have worked for **L. J. SIMPSON**

"Your Kind of a Man for Governor"
The Highest possible endorsement. The most rigid test that his policies, practiced over a period of twenty years, are **SOUND, JUST AND EFFICIENT.**
THE BEST POSSIBLE PROOF that his pledges to the citizens of Oregon are not mere "words," but **"WORDS BACKED BY WORK."**
Those who know him believe in him, believe in his **ABILITY,** believe in his **POLICIES.** They know he will give Oregon a **CLEAN, IMPARTIAL, BUSINESSLIKE** administration. They know it to be true, **ABSOLUTELY.**
WHY?
Because—
In nineteen years he has employed 21,000 men. He has always paid good wages. He never had a strike or a personal injury suit. He built many homes "on time," never foreclosed a mortgage or sued on a promissory note. He has helped many laboring men to acquire their homes, their business and their livelihood. These workers, who know him best, have endorsed him to a man, have adopted the above slogan and that's **"WHY"** he is "Your kind of a man for Governor."

DELCO-LIGHT
Increases Farm Efficiency

- Saves time and labor**—Work formerly done under poor light and by hand can be done better and in less time with the aid of electric light and power.
- Labor is attracted to the farm**—The "back to the farm" movement is made practical when the conveniences afforded by electric light and power can be had in the country.
- Keeps the boys and girls on the farm**—Electric service on the farm offsets city attractions. Valuable labor and valuable young manhood and womanhood are saved to the country community.
- Solves the retired farmer problem**—Electric light and power make the farm home so attractive and comfortable that the farmer and his wife remain on the farm where their advice, experience, and immediate interests are of great practical value.
- Lightens burden of the housewife**—Increased farm work in war times means increased labor for the housewife. Electricity offers the only practical means of taking the drudgery of household tasks from her shoulders.

Delco-Light is a compact electric plant for farms or country homes. Self-cranking. Air-cooled. Thick plate, long-lived battery. Ball bearings. No belts.
