Turning Used Cars Into Profitable Trucks

TRUXTUN

Truck Attachment
Makes Lowest Cost Dependable Truck
Fits Any Make of Car
Internal Gear Shaft Drive

The driving mechanism of the Truxtun is of a type that has proved most efficient.
Most of the heavy hauling of the armies of the world is done with this type internal gear drive.
The Truxtun is durable, economical, and reasonable in price.

LOCAL DEALERS, HEPPNER.

YOU! Do Your Christmas Coaling Early

HEED FUEL ADMINISTRATOR GARFIELD'S WARNING.

PULL TOGETHER-GET SERIOUS-WE'RE AT WAR
There is plenty of coal to supply all

BUT

It can't be mined and transported in eight months. It takes twelve full months to mine a year's supply.
There are only 200 days left until the snow flies. Deliveries are blocked!

DON'T ARGUE—PROVIDE STORAGE ROOM—
If you haven't the cash on hand, borrow it.

Store Coal Now

IN MAY, JUNE AND JULY

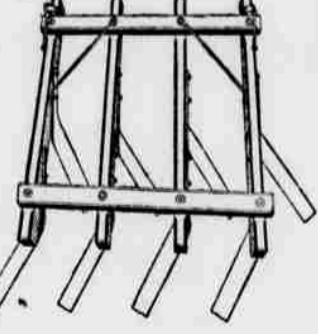

Make what sacrifice is needed to keep your home warm, your factory running, and the food, clothing, arms and ammunition necessary for our Soldiers "Over There" flowing in a steady stream to the front.

Help win the war and protect yourself and your business at the same time.

"Tum-A-Lump"

(FOR ALL THATS GOOD—IN COAL OR WOOD)

SEE LEW AT LEXINGTON OR BILL AT IONE

HELP is SCARCE

and the weeds will ruin the summer-fallow if not killed.

THE JONES WEEDER

will save 50% in labor and do a better job than the usual methods.

Get yours early before they are all gone

SPECIAL WAR PROBLEMS WILL BE MET BY O.A.C.

Men Will Be Trained for Effective Military Service—War Work For Women.

O. A. C., Corvallis, July 10.—Special war conditions will be met by the Oregon Agricultural College next school year.

All students over 18 years of age will be urged to join a military training unit and thereby become members of the United States army. The government is in need of men trained along technical lines and consequently students who enroll in the college next fall will have an opportunity of obtaining the training desired by Uncle Sam. Those under 18 will be urged to join the unit, but it will be the policy of the government not to call the men into active service until they reach the age of 21.

The government is sending enlisted men by the hundreds to O. A. C. because the demand in the army for men with technical training is far greater than even the normal output of technical colleges like O. A. C., and none of these colleges are able to supply anything like its normal output. It will be possible for young men to return to or start in college with the feeling that they are doing the bidding of their government and are by no means slackers.

Practically all types of training for military service most in demand will be offered by the Oregon Agricultural College. For any but advanced officers and aviators, the college will offer not only all the types of training given in the customhouses and training camps, but in addition engineering, commerce, mining, forestry, pharmacy, chemical engineering, sanitation, veterinary medicine, physical education and the trades and industries, as well as all phases of home economics. The courses will all involve essential war training.

Effective military work requires preparation. The higher and more effective the service, the longer and more exacting is the training. The government isn't sending men to the front trenches to be slaughtered. It is sending men there whose resources and training have proved that they can take terrible toll of the enemy and at the right moment go over the top.

ARMY ENGINEERS ACTIVE

Troops of the Engineers Corps, the seldom mentioned in the dispatches from the front, perform duties of the very highest importance in any campaign. The main duties of the engineers "is to apply engineering and science to the emergencies of modern warfare to protect and assist the troops. When circumstances demand they are thrown into the combat as purely fighting units. They are charged specifically with surveying and reconnoitering for military purposes; they make maps which determine the plan of the campaign; they prepare camps, open roads, lay bridges across unfordable streams, handle the railways and operate armored trains, organize bases from which to launch the attack, fortify points of support, force an opening through the enemy's obstacles, blow up his forts, operate search lights; they construct wire entanglements, destroy bridges, blow up depots, wreck roads, and in general are ready to do anything which the non-technical troops cannot do. In the present war the duties of the Engineer Troops are so varied that a man who has been trained in civil life to "do things" can be so placed in the engineers that his training will be of value to himself and his country. Engineer Troops were among the very first soldiers to go to France last year. Several new regiments of the United States Engineers are now being recruited and organized in different parts of the United States. The 604th at Vancouver Barracks, and the 470th at Camp Fremont, Cal., though America's one great Engineering Training Camp is at Camp Humphreys, Virginia, near Washington, D. C., this is to be the great school of instruction for engineers in all the branches of their activities, including gas offense and defense, highway building, bridge building, mining, pumping, sapping, and a variety of related subjects.

Men outside the draft age who have not passed their 41st birthday are urged to join the engineers. Promotion will be rapid for those who show special adaptability and force. All enlistments are for the duration of the war only, unless sooner discharged. Application for enlistment should be made to the nearest Army Recruiting Station, or to nearest Postmaster.

Mrs. Hesse McAtee Kinney and I. C. Bennett, both of this city, were united in marriage at Ione on July 4th, Rev. J. L. Jones, pastor of the Congregational church at that place performing the ceremony. These are well known people of Heppner and this paper extends to them its hearty congratulations. At the present Mr. Bennett is in charge of the Minor & Thompson sheep, but the newly-weds will continue to make their home in this city.

Meat Must Be Sold

Fresh meat is perishable. It must be sold within about two weeks for whatever it will bring.

A certain amount of beef is frozen for foreign shipment, but domestic markets demand fresh, chilled, unfrozen beef.

Swift & Company cannot increase prices by withholding meat, because it will not keep fresh and salable for more than a few days after it reaches the market.

Swift & Company cannot tell at the time of purchasing cattle, what price fresh meat will bring when put on sale. If between purchase and sale, market conditions change, the price of meat must also change.

The Food Administration limits our profit to 9 per cent on capital invested in the meat departments. This is about 2 cents per dollar of sales. No profit is guaranteed, and the risk of loss is not eliminated.

As a matter of fact, meat is often sold at a loss because of the need of selling it before it spoils.

Swift & Company, U.S.A.
