B. G. Sigsbee has accepted a position as bookkeeper in the up-town office of Heppner Milling Co., and began work there Monday. The place has been filled for a number of years by L. W. Briggs who, on account of ill health, is having to seek less confining employment. Mr. Sigsbee has been employed for several weeks past at the office of Heppner Light & Water Company, making up abstracts of the inventory of the Company's property.

Fred Bartholomew was up from Estacada the past week and spent several days at the home of his mother in this city, Mrs. Mary A. Bartholomew.

Mr. and Mrs. John F. McMillan, of Lexington are now the proud parents of a son, born at Heppner Sanatorium on Monday, July 9th.

INTERESTING ITEMS FROM COUNTY AGENT

Early Baart Wheat Makes Good Showing.

With the harvest under way and all the grain practically ripened, it is now possible to make some estimate of the value of using Early Baart for the spring seeding. A large number of farmers in the county used that variety along with the Bluestem so that some very accurate figures can be obtained, comparing the two varieties. There has been a large difference in every case during the season, and this difference is going to show, when the final figures are obtained, where if possible the total yield of an entire field of Early Baart is going to be compared to the total yield of the Bluestem under similar conditions. But where the two fields are not identical as to soil conditions we expect to take small plots that are on similar ground and make a careful determination of the yield so that we may show exactly what has been gained by using Early Baart this spring.

Demonstrations Showing Results.

The County Agent is busy during this month making a determination in the field under various methods of farming. A number of demonstrations where part of the field was harrowed and part left unharrowed are being checked to obtain some definite figures relative to that practice. One of the first of these to be checked is that of Brewa Brothers, north of Lexington, where the part that was harrowed showed a decrease of almost 30 per cent under the part not harrowed. All of these failures will be collected by the County Agent and published as soon as available.

Good Seed.

Field inspection is being carried on in a number of places for the purpose of determining where the best seed wheat may be obtained. There is no doubt but what there is going to be a heavy demand for Early Baart seed during the coming year, and if a field is found where no other variety is growing, the farmer will be advised to hold that for seed. In this way those wanting pure seed will know where to find it.

Where the mixture of other varieties is small the growers can easily take out those other varieties before harvest and make an extra profit by having pure seed. If you are interested in holding your grain for seed notify the County Agent and he will have the inspection committee visit your field and certify that it is clean.

County Agent's Office to be Kept Open.

Arrangements have been made so that there will be some one in the office of the County Agent from 8 to 5 each day for the present, so that the labor question may receive more consideration than it has in the past, and at the same time the County Agent will be able to check up the outside work. It is hoped that if help is going to be needed that application will be made as far in advance as possible, and only by the fullest cooperation can we hope to meet the needs of the county. This means that in case you have applied for help and have secured it in other ways that you will notify the county agent at once. Phone your needs to 762 and you will be put on the list.

Labor.

The labor situation just at present is growing more critical. Those farmers who failed to make application for the help they are going to need are finding it difficult to fill up their crews at the last minute. Those applying early have had no trouble in supplying men. At the present time however, we are notified that men are available in Portland, but will be sent out only when there is a definite application made so that we will not be giving help that will be needed in other places.

ALL TRASH MUST BE CLEANED UP!

Notice is hereby given that, Tuesday, Wednesday and Thursday, July 23, 24 and 25 are to be general clean up days for Heppner. All trash of every description must be removed from the City. The City Council will have teams to haul off the trash, owner to pay reasonable price therefor. Arrangements have also been made to use the burned off part of town where all trash that will burn will be burned by the Marshal, saving a lot of expense in hauling. People will therefore see that all trash that will burn is kept separate from that that will not burn.

W. W. SMEAD, Mayor.
Heppner, Oregon, July 17, 1918.

Wool shipments from the Heppner station for the month of June aggregated 1,264,000 pounds, according to the records of the officials at the depot.

Oscar Edwards is home from Taft, Oregon, where he has been during the past year working in the ship yards. He has returned to help in the harvest fields on the Edwards farm in Sand Hollow, and may decide to remain here permanently, as the prospects are good for carpenters at Heppner.

The Choice of Those Who Know

Manufacturers and leading motor car distributors recommend ZEROLINE. The majority of motorists use ZEROLINE. ZEROLINE reduces wear and gives more power because it keeps its lubricating body at cylinder heat. Gives less carbon because, being refined from selected California asphalt-base crude, it burns clean and goes out with exhaust.

ZEROLINE is the correct oil for all types of automobile engines. It is the correct oil for your automobile. Get our lubrication chart showing the correct consistency for your car.

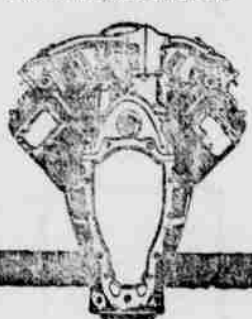

At dealers everywhere and Standard Oil Service Stations.

STANDARD OIL COMPANY
(California)

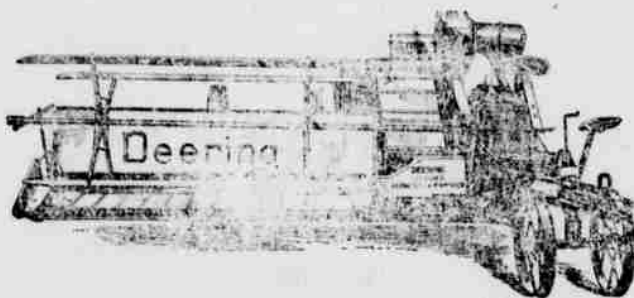

ZEROLINE
The Standard Oil for Motor Cars

Correct Lubrication for the "V" Type Engine

This "V" Type of automobile engine, like all internal combustion engines, requires an oil that holds its lubricating qualities at cylinder heat, burns clean in the combustion chamber and goes out with exhaust. Zerolene fills these requirements perfectly, because it is correctly refined from selected California asphalt-base crude.

G. W. MILHOLLAND
SPECIAL AGENT
HEPPNER, OREGON

WITH the Deering Combined Harvester you can harvest your crop for one-half the expense you can any other way. Two men is all that is necessary to put your wheat in the sack.

The machine cleans the grain in perfect manner, takes out and saves all weed seed and leaves straw in bunches to be easily taken care of.

Can furnish them with or without an engine. Will have to have your order early in order to insure getting the machine. The factory is limited to a definite number of machines and when that number is reached there will be no more for anyone.
