NOTICE TO THE PUBLIC!

The people of Heppner are requested to clean out their cellars and basements that were filled last week, as soon as possible, and to also use disinfectants so that the danger of typhoid may be reduced to the minimum.

W. W. SMEAD, Mayor.

I would kindly request that all those who were owing me on account of board and room rent at the time of the fire, will now settle up. I have many adjustments to make and need all that is coming, and need it promptly. Will you assist me. PALACE HOTEL CO. J. L. Wilkins, Manager.

NOTICE!

Notice is hereby given that any person who builds any fire within the corporate limits of the city of Heppner within 50 feet of any building without first obtaining the consent of the Marshal will be prosecuted to the full extent of the law. This notice to be in effect until further notice. W. W. SMEAD, Mayor.

Phone Main 204 for your baggage transfer or the bus to the depot. M. L. CANTWELL.

ALL TRASH MUST BE CLEANED UP!

Notice is hereby given that, Tuesday, Wednesday and Thursday, July 23, 24 and 25 are to be general clean up days for Heppner. All trash of every description must be removed from the City. The City Council will have teams to haul off the trash, owner to pay reasonable price therefor. Arrangements have also been made to use the burned off part of town where all trash that will burn will be burned by the Marshal, saving a lot of expense in hauling. People will therefore see that all trash that will burn is kept separate from that that will not burn. W. W. SMEAD, Mayor. Heppner, Oregon, July 17, 1918.

A PASTURE UNDER COVER

O. A. C., Corvallis, August 7.—A silo is a pasture under cover, the contents of which can be used at any time of the year as a profitable feed for dairy cattle, beef cattle, horses, mules, sheep, hogs, and chickens, points out E. L. Westover, dairy husbandman and L. E. Robinson, assistant professor of rural architecture at O. A. C., in Extension Bulletin No. 297 just issued.

Some of the important points in silo construction brought out are as follows:

The foundation should be well constructed and should be made of concrete possessing the greatest possible density, so as to prevent the silage juice from seeping through into the barnyard.

The top of the foundation should be at least ten inches above the ground line.

The walls of the silo should be practically air-tight.

The inner surfaces of the walls should be smooth and perpendicular. The inner surfaces of the walls should be free from corners; hence round silos are more efficient and economical than other type.

A good roof makes the silo more durable, adds greatly to its appearance and assists materially in keeping the silage from drying out.

The bulletin is entitled "A Silo For Every Farm" and may be had for the asking.
