

Packers' Profits —Large or Small

Packers' profits look big—

when the Federal Trade Commission reports that four of them earned \$140,000,000 during the three war years.

Packers' profits look small—

When it is explained that this profit was earned on total sales of over **four and a half billion dollars**—or only about **three cents** on each dollar of sales.

This is the relation between profits and sales:

If no packer profits had been earned, you could have bought your meat at only a fraction of a cent per pound cheaper?

Packers' profits on meats and animal products have been limited by the Food Administration, since November 1, 1917.

Even Small Deposits are invited

We encourage them because large accounts begin in a small way.

The small deposit of today becomes the large one in the future.

More people would become depositors if they realized what an aid to the upbuilding of credit and success an account with a strong bank can be.
