## REGISTRATION OF MEN 18 TO 45 WILL LIKELY BE IN SEPTEMBER

Portland, Ore., August 14.—Some time early in September, every man in Oregon between the ages of 18 and 20, and 32 and 45 years, inclusive, will be required to register under the new draft law, now before Congress.

These age limits are as yet tentative, as the bill has not been finally acted upon. Minor changes may be made in the age limits. But they will be in general as stated in the foregoing.

The exact date of the opening registration day has not yet been set, and cannot be set until Congress passes the law to lower and extend the draft ages. But it is considered certain that the law will be passed very soon and that the registration day to be proclaimed by the President will be early in September.

Every man who comes within the designated ages should keep himself very carefully informed, for his own protection, about the status of the new draft measure, and especially as to the day fixed for registration. Failure to register on the proper day will subject the neglectful person to a heavy penalty. Ignorance will not excuse him.

Oregon is pretty well versed in the procedure to be complied with by men of draft age on registration day, for already two such draft registration days have been held in the state.

The first was that of June 5, 1917, when all men from 21 to 30 years of age, inclusive, were required to register for military service. The second registration day was that of June 5 of this year, when all men who had attained their 21st birthday since registration day of the preceding year were required to register.

The coming registration day will be even more important than these two, for the number of men to be registered is estimated at fully one-third greater than on June 5, 1917. It is believed that in Oregon alone fully 100,000 men will have to register.

So far as possible, registration places on the coming registration day will be in the regular voting places. Local Boards will be in full charge of the registration.

Local Boards have received instructions to make all preliminary arrangements at once for conducting the registration, so there will be no delay when the President's proclamation is issued. Registrants are to be appointed for each precinct, on the ratio of about one to each probable eighty registrants.

Interpreters also will be provided where necessary to facilitate registration.

## MR. FARMER:

Ground, no matter how good or how rich, cannot be called a farm until the careful planning of a practical man, backed by lots of push and hustle, has made it yield what nature made it capable of yielding.

Good timbers, board, planks, shingles, doors and windows are like good ground. They do not make a home or a barn without the same careful planning.

Suppose you are thinking of building a new barn, a better HOME, a modern chicken or hog house.

Because you lack the years of experience in building that you have had in farming, you hesitate and are at a loss to know what type of building will best suit your convenience and give you the most value for the money you will spend.

Too often, all you can get from a lumber yard is the material with which to build. We are prepared to give you more than material alone, because we believe in giving you the last penny of value for your dollar.

No matter what you are thinking of building, we want to help you plan it. Tell us what you want to build, and we will put it down in black and white; we will draw a plan to scale so you can see how it will look when completed.

We will show you designs (approved by experts) of almost any kind of building; designs from which you can get good and practical ideas. These ideas can be embodied in the plans for your buildings.

Yes, and we will do more. We will make up your material lists and give you a figure on enough material to complete your building. And, if you build strictly according to plan, we will GUARANTEE that there will be no "extras," no afterclap of greater costs than you had planned on.

How much better that is for both of us than doing it the old way of telling some one what you wanted to build, having him make up a list of what he THOUGHT it would take and getting a figure on that list.

We both know of many such cases where the material was hauled to the job, the carpenters went to work, and then it was found that changes had to be made. It meant trips to town when they could poorly spare the time, material to go back, more to come out, and an endless lot of trouble, worry and bother.

You know the rest of the story. It was found that the completed building had cost much more than had been planned. It meant debt, borrowed money, notes to sign. But worse than all the rest, the completed building was not quite what they thought it would be.

Disappointment, discontent, inconvenience, all the sure result of INCOMPLETE PLANS.

We not only do not want that to happen to YOU; we will see that it does not happen if you will bring your building problems to us.

Building in haste means waste. Let us first make a rough sketch for you. You can take it home, take time to think it over; talk it over with your wife or your neighbor. Then bring it back and we will change it until it is just what you want and need. After that, we will make completed drawings, to scale, so you can see exactly what it will be like, when built.

We will then figure the cost, and remember, we guarantee that if you build according to plans, the cost of material will not be more than our figure.

None of your building problems are too small to interest us. A model hog house that saves little pigs and keeps them healthy, a warm, light chicken house that will increase egg production, get the same care as the plan for a big barn, or a fine, new home.

Are you wondering what this service will cost you? Not a single red copper cent. We make no charge for it, and it does not add a cent to the cost of your material. Instead, it actually saves money for you.

We are ready to prove this statement to YOU.
