Liberty Loan Will Use the Round-Up.

Pendleton, Ore., Sept. 3.—Oregon state Liberty Loan headquarters are making extensive plans for featuring the Fourth campaign before the crowds at the ninth annual Round-Up in this city Sept. 19-21. Their tentative program includes bringing to the city the military band from Camp Lewis, a trainload of trophies from the battlefields of France and a number of speakers to make short talks from the crowds at the stadium.

Milton R. Klepper, state speakers' manager, called upon the directors of the Round-Up to lend the fame of their show to advertising the Fourth Loan, the campaign for which will open the week following the Round-Up. The directors, having already pledged all profits to the Red Cross, gave the Liberty Loan officials free leave to advance their campaign in any method they choose and will cooperate in preparing some novel and attractive features for the parades and show.

People once went to New
York for the Opera Season--
Now they stay at home with
The NEW EDISON

FOR this marvelous instrument brings Grand Opera right into their homes. A new audio system to appeal to the double appeal: to the eye and to the ear. The New Edison can't supply the former but it certainly does the latter. So far as hearing the great artists of to-day is concerned they themselves can give you no more than

The NEW EDISON*"The Phonograph with a Soul."*

You can't improve upon perfection and this invention Re-Creates the singer's voice with such perfection that no human ear can distinguish artist from instrument. The Edison tone tests in which the singers have sung in direct comparison with the New Edison have proved this to more than 2,000,000 listeners. More than 1500 of these tests have been held. More than 30 great artists have appeared in them. Drop into our store to-morrow and hear a demonstration.

Oscar R. Otto

Heppner, Oregon

Edison Re-Creations should not be played and cannot be played properly on any other instrument. If they could be, the manufacturers who seek to profit by Mr. Edison's research work would be able to make tone test comparisons, such as have been made with the New Edison before two million music lovers.
