MUST NOTIFY WHEN
RESIDENCE IS CHANGED

United States Marshal, G. F. Alexander, received instructions from the Attorney General of the United States calling attention of German alien females to the following important requirement, governing the change of residence of German alien females.

A German alien woman changing her place of residence to another place within the same registration district shall immediately report such change to the registration officer of the registration district and present to such registration officer her registration card for the purpose of having endorsed thereon by such registration officer the change of residence.

A German alien female who desires to change her place of residence to a place of residence within another registration district must obtain a permit. Such German alien female must present herself to the registration officer of the district in which she resides and make application for the permit on a form supplied by the registration officer, and present her registration card to the registration officer for the purpose of having the permit of change of residence endorsed upon her registration card.

A change of residence in violation of the Regulations subjects an alien enemy, among other penalties, to arrest and detention for the period of the war.

The registration officers who acted in the registration will continue to act as registration officers for the purpose stated in respect to permits for change of residence.

The United States Marshal, Portland, Oregon, has a supply of change of residence blanks in his office for distribution to the Chief Registrars (Chief of Police) in cities of over 5,000 population, according to the 1910 census; and to the Postmasters (Assistant Registrars) in communities having a population of less than 5,000 according to the 1910 census.

People once went to New
York for the Opera Season--
Now they stay at home with
The NEW EDISON

FOR this marvelous instrument brings Grand Opera right into their homes. Every word comes to the eye and to the ear. The New Edison can't supply the former but it certainly does the latter. So far as hearing the great artists of to-day is concerned they themselves can give you no more than

The NEW EDISON

"The Phonograph with a Soul."

You can't improve upon perfection and this invention Re-Creates the singer's voice with such perfection that no human ear can distinguish artist from instrument. The Edison tone tests in which the singers have sung in direct comparison with the New Edison have proved this to more than 2,000,000 listeners. More than 1500 of these tests have been held. More than 30 great artists have appeared in them.

Drop into our store to-morrow and hear a demonstration.

Oscar R. Otto

Heppner, Oregon

Edison Re-Creations should not be played and cannot be played properly on any other instrument. If they could be, the manufacturers who seek to profit by Mr. Edison's research work would be able to make tone test comparisons, such as have been made with the New Edison before two million music lovers.
