ers of delinquent property of such delinquency through publication notice.

Second—That because of the failure of county assessors, past or present to correct assessment rolls so as to conform to the deed record, Sheriffs are not in possession of the names and address of owners of delinquent property and a written notice is therefore impractical.

Third—That under the system of mailed notices the mortgagee of incumbered property is not notified of tax delinquency.

Fourth—That the entire cost of the publication notice is paid for by the owner of delinquent property and not by the general taxpayers.

Fifth—That the owner of delinquent property is not the unfortunate troller, but the boom real estate operator or the careless person. The former should receive publicity for the protection of poor persons who are purchasing from him on installment contracts and who have no means of learning of tax delinquency. The latter needs the published notices to direct his attention to his delinquency.

Sixth—That the discontinuance of the published notice will result in far more property becoming delinquent thereby reducing available revenue to the state and its political subdivisions, and receiving the opportunity for the operations of the delinquent tax shark.

Seventh—That by increasing the amount of unpaid taxes the general taxpayer is compelled to raise additional revenue. Therefore the retention of the present publication law is for the protection of the general taxpayer.

Eighth—That the end sought is to reduce the cost of permitting taxes to become delinquent then the subject should be approached in a rational and scientific manner. A measure should be framed providing for reduction in penalties or interest, but in such manner as will not endanger delinquency.

We, your committee appointed to suggest to the state Liberty Loan committee a method for raising funds for the purchase of space in the newspapers of the state, beg leave to report as follows:

Appreciating the past hearty cooperation extended the press of the state by the State Publicity Committee, we wish to pledge to the State Committee our earnest cooperation with our news and editorial columns and we trust that the committee will call upon us and give us the opportunity to serve to any reasonable extent.

We agree with the State Committee that the desired results can not be achieved with news and editorials alone and we approve the proposal of the State Committee to make liberal use of the advertising columns of the papers of the state.

We do not feel, however, that we should be called upon to solicit funds for advertising in our own columns. We do not wish to be placed in the position of soliciting funds for our own profit and thereby leaving ourselves open to the accusation of profiting upon the patriotism of the people.

We remain of the opinion, however, that the use of advertising space is necessary and also that the newspapers have done their duty when they give full news and editorial support.

That a committee of five be appointed from this association to meet next week with the county managers of the Fourth Liberty loan; that at that time the amounts desired for advertising in each county be apportioned and that the method of raising such fund be devised at such time and that such funds, be expended as suggested by the state committee.

We suggest that the committee appointed from this association to act with the Liberty Loan committee be given power to act for all the members of this association.

This committee suggests that in cases where the funds for Liberty Loan advertising must be raised by private subscriptions, that the committee having this matter in charge prepare lists of those who have previously subscribed to similar loans, as well as lists of those who haven't so subscribed, but should, and that the state committee co-operate by writing to the persons given in such lists.

Whereas, the Oregon State Editorial Association, during the 1918 session of its convention, has been royally entertained for three days by the open hearted hospitality of the people of Coos Bay, and Whereas, this association has been brought in touch with one of the greatest sections of our great state, and has witnessed the activities in lumbering and shipbuilding, which without itself has been a liberal education to all the members of the Association attending this session, therefore, be it resolved that the thanks of this association be extended to the North Bend Chamber of Commerce, the Marshfield Chamber of Commerce and Hon. Louis J. Simpson; the commercial organizations and Mr. Simpson co-operating to make our visit one of continuous pleasure and profit. And we do especially thank Mr. Simpson and his wife for the kindly invitation to spend a part of its sessions at beautiful Shore Acres their mansion by the sea, where we

have enjoyed the most royal hospitality.

Our thanks are also extended to the McDonald & Vaughn Logging Company for the courtesies extended this association at their spruce camp and for the luncheon served at the noon hour.

That our thanks go to the American Type Founders Company and the Blake, McFall Company, of Portland, for the beautiful and appropriate badges furnished gratis to this session of the Association.

**PRECAUTIONS AGAINST POISONING OF SHEEP.**

The movement of sheep from the several Forest Reserves of Oregon will soon take place and heretofore numerous losses caused by the eating of poisonous plants has been experienced by a number of sheep owners in certain sections of the state. In order to protect against the possible loss of sheep by plant poisoning the following precautions are recommended:

It has been found that sheep are more apt to become poisoned by eating lupine when they are hot and very hungry, therefore the sheep most likely to be poisoned are those that are trailed out from the Forest Reserves later in the season, the sheep first moved as a rule consume all of the available vegetation, therefore the feed that is most likely left is that which is ill-suited for sheep forage. Occasionally owners will, in an effort to avoid possible poisonings hurry their animals. This has been found to be a practice which is possibly responsible for many of the losses. Sheep when allowed to drift through a patch of lupine, or for that matter, other poisonous plants, will frequently not eat greedily of it, while if they are hurried or closely grouped they seem to lose their natural instinct and will gorge themselves. It has been found that sheep are very greedy and are imitators. When one eats of a quantity of a plant, others will attempt to do the same.

Apparently the greatest losses occur after the sheep are once brought down to the headquarter ranches. They are generally in a more or less starved condition and owners will frequently turn them out the following day and allow them to eat at will and being in a famished condition, they will frequently start in on the lupine that is everywhere present in certain sections. Whether the poisoning always results from the poisonous principle of the plant or whether it results from the condition known as overloading it is difficult to say. At any rate, great losses are frequently experienced. Lupine in the pod stage is poisonous. Owners can guard against this by allowing their sheep to fill up on dry feed before being turned out, then it would be well for owners to carefully herd them until they have become well filled. After being down in the foot hills for a few days the principal dangers will have subsided.

Antidotes, as a rule, are not efficient against troubles arising from the eating of poisonous plants. The only really safe method lies in precautionary handling and feeding. In short, do not hurry sheep through lupine districts, when massed they eat everything. Best avoid poison districts if you can. Do not allow sheep to graze on the lower fall range until they have been filled up on dry feed and rested a day. Do not allow sheep to become worried

or excited when first turned out on a new range or in trailing down from the Forest Reserve, allow them to spread out and drift.

J. A. Miller has leased the electric light plant to J. B. Sparks of Heppner. Mr. Sparks is an experienced man in the business, having installed and owned a plant of his own, which he made a success of. He will install an oil burning engine near the center of the town so as to equalize the load, and he expects to have the plant running as early as possible—not later than November 15th. Mr. Sparks has an option to purchase the old plant, all but the steam engine. The people of Fossil will appreciate the electric lights when

the plant is in operation again, and we are thankful to Mr. Miller for his efforts to get them in operation permanently.—Fossil Journal.

The Civil Service Commission, Washington, D. C., announce a Civil Service examination for the position of Forest Ranger, Forest Service, U. S. Department of Agriculture, at Pendleton, Oregon, on October 28, 1918. Full particulars and application blanks etc., may be obtained from the Commission at Washington, D. C., or the Forest Supervisor, Pendleton, Oregon.

E. E. Miller and wife, of Ione, were visitors in Heppner for a short time Wednesday afternoon.

**"Proven Entirely Satisfactory"**

Only perfect satisfaction can account for the use of ZEROLENE by the majority of automobile owners.

Leading coast distributors also testify that it is "a most satisfactory motor oil." They know from the records of their service departments—and we know from exhaustive tests—that ZEROLENE, correctly refined from selected California asphalt-base crude, gives perfect lubrication with least carbon deposit. Get our lubrication chart showing the correct consistency for your car.

At dealers everywhere and Standard Oil Service Stations.

**—and They All Look Good**

—they not only look good, but they feel good and they wear well and keep their shape forever.

There's a wonderful difference between a well-knit, all wool-of-high-grade, ribbed stitch sweater and the common sweaters that you buy in the dark, as it were.

Buy your next sweater or bathing suit carefully; look at the label, and if you find the name Jantzen thereon, you can rest assured that you are getting a garment that you will enjoy owning for a long, long time.

There's a Jantzen dealer in your town.
