FOOD NOTES.

Mr. Hoover has sent out word to the state food administrators to the effect that the people should not relax their efforts to conserve food. Some people have been misled by the relaxation of the regulations as to flour, and have concluded that the need of conservation is over. Such is not the case. Farmers are urged to conserve on feed for stock, also. The corn crop has been cut by the dry weather, and this means less feed.

The sugar situation is still serious. Merchants are requested to limit their October purchases to actual needs. The demand for canning sugar has exceeded the quota allotted to Oregon, and it will be necessary to save in October enough to make up for that. The people are urged to dry fruits which may be dried, especially prunes and apples. Limit the making of preserves and jellies to the minimum. Reports are coming in from hundreds of families that they are keeping down to the Italian allowance of one pound per month per person for table use. This is practical patriot-ism. This kind of action is very refreshing in comparison with that of some people who are very careful to buy the last ounce to which they are entitled. As Webster said at Bunker Hill, "Nothing is impossible to Americans."

S. E. NOTSON, County Chairman.

Spencer Crawford of the Gazettelimes force left under orders for ancouver barracks on Saturday, where he was to report for special limited service. He has passed his examinations OK and when his equipment has been issued to him, he will return to Heppner and become an assistant in the office of the local draft board at the court house. It is intimated that this work will be over about the first of the year and the boys thus engaged will be taken by Uncle Sam for other lines of war work, if they are not inducted into the regular army service. They will either be sent to France or Siberia, wherever the need demand.

People once went to New York for the Opera Season--Now they stay at home with The NEW EDISON

F OR this marvelous instrument brings Grand Opera right into their homes. e out side of control of control is a set of the est. The New Edison can't supply the former but it certainly does the latter. So far as hearing the great artists of to-day is concerned they themselves can give you no more than

The NEW EDISON

"The Phonograph with a Soul."

You can't improve upon perfection and this invention Re-Creates the singer's voice with such perfection that no human ear can distinguish artist from instrument. The Edison tone tests in which the singers have sung in direct comparison with the New Edison have proved this to more than 2,000,000 listeners. More than 1500 of these tests have been held. More than 30 great artists have appeared in them.

Drop into our store to-morrow and hear a demonstration.

Oscar R. Otto

Heppner, Oregon

School Re-Creations should not be played and cannot be played properly on any other instrument. If they could be, the manufacturers who seek to profit by Mr. Edison's research work would be able to make tone test comparisons, such as have been made with the New Edison before two million muic lovers.
