

LIVE CECIL NEWS ITEMS

The Misses Logan, Hynd and Lowe spent Sunday at the Franklin place.

Lewis Montague of Arlington was visiting at R. S. Wilson's on Sunday.

T. W. May of the Lone Star Ranch was a Cecil caller on Monday.

Mr. and Mrs. T. H. Lowe were the guests of J. W. Osborn Wednesday.

Ellis Minor of Ione was doing business in Cecil on Wednesday.

Miss Annie Hynd visited with Miss Etta Barnes on Wednesday.

Miss Carrie Nash is spending a few days with her grandmother in Cecil.

Miss Ada Nash has been spending the past few days at the Leon Logan place.

J. W. Osborn, Clarence Winter and J. H. Pepper were Heppner visitors on Wednesday.

Mr. and Mrs. Ed Farnsworth of Rilea Sliding were doing business in Cecil on Monday.

David Hynd of Sand Hollow came in on Wednesday to visit his brother Jack for a few days.

A Hendricksen returned to his ranch on Wednesday after spending a few days in Heppner.

Everett Logan, having sold his hay, is now very busy baling the same.

Bob Montague of Toppenish, Wash., spent Thursday with his sister, Mrs. R. S. Wilson.

Congratulations to Mr. and Mrs. Oscar Lundell upon the arrival of a fine son on Tuesday morning.

Miss Hazel Winter was the guest of Miss Annie C. Lowe on Thursday and Friday.

Mr. and Mrs. R. A. McFadden of Eight Mile were doing business in Cecil on Thursday.

Oral Hendricksen, who has been spending his Christmas furlough with his parents, returned to Bremerton Navy Yard on Sunday.

Henry J. Streeter was seen crossing Butterby Flats with his Cleveland tractor on Friday showing Jack and Dave Hynd what he could haul with so small a machine.

Owing to the continuous frost sheepmen on Willow creek have had to bring their sheep down to the creek for hay feeding. The thermometer registered 9 above zero Saturday, Jan. 4.

The following people spent the day at the John Nash place on Wednesday: Mrs. Peter Nash, Mr. and Mrs. A. E. Nash, Leon Logan and family, Mr. and Mrs. Boyd Logan and family and J. H. Pepper.

J. W. Osborn, accompanied by J. H. Pepper, was in Ione on Monday. Mr. Osborn had during the past week ran a silver from a fork handle into the palm of his right hand which was giving him a lot of pain and it was necessary for him to have it attended to by Dr. C. C. Chick.

Dr. Phy to Return.

Hot Lake, Oregon, Jan. 1, 1919.—Word has been received from Dr. W. T. Phy that he has secured his release from the Government service at Letterman General Hospital, San Francisco, and will be permanently at home at Hot Lake Sanatorium about the tenth of January.

OREGON FUEL NEWS

Portland.—Soft coal can be burned successfully in base burner stoves by removing the magazine and providing an air supply pipe over the top of the fire and a direct smoke pipe outlet from the top of the stove. Soft coal cannot be burned satisfactorily if fired the same as hard coal.

Directions for burning soft coal in base burners have been ordered by B. E. Kennedy, State Director of Conservation, and will be ready for distribution from the office of State Fuel Administrator Fred J. Holmes, upon arrival.

Common salt will remove soot and tar from the heating surface, flues, smoke pipes and chimneys of domestic heating plants, according to Fuel Administrator Fred J. Holmes. To apply, spread two or three handfuls of salt on the hottest part of the fire at a time when the fuel bed is bright or incandescent, then close the door and open the drafts. The furnace will become filled with dense, white fumes which will penetrate through the pipes and clean the sooty surfaces.

An application of salt treatment occasionally will keep the heating surfaces in efficient condition. The chemical action will not be detrimental to the heating plant.

Maximum heat at minimum cost is the natural result of efficiency in firing.

A man who is master of his furnace has few heat complaints from his family or his tenants.

A furnace should be something more than a consumer of fuel. Keep the home warm by making it work under proper conditions.

Minor Musings

A "heavy" thinker is often a light actor.

A loyal wife is one who knows her husband is poor because he is too bright to make money in the low kind of business his neighbor got rich in.

A spoiled employe dreads the "fire."

Even a lame horse will go far in the mud.

A poor man is always safe in saying he would not exchange places with his rich neighbor.

A cheap pun is remembered after a wise saying is forgotten.

Because a man is bald-headed he is not necessarily a "highbrow."

The wrong kind of friend will pursue you most of the days of your life.

Babies are queer institutions. They never seem satisfied with what they have and yet they don't want much.

Most married men think they did the proposing, but they didn't.

Most normal boys have wished to be pirates but you never heard of one that longed to be a food profiteer in war times.

The people that believe all estates should go to the state know they will never inherit any money nor leave any.

If every day you see "the prettiest girl I ever saw in my life," you're over 45.

It might help a lot if, after the war is over and the soldiers are home, the women who have been knitting so industriously for the soldiers would keep right on knitting for their families.

Is there now any place that has a town pump located on the public square, a timeup with holes in it on top to make it so worthless nobody will steal it, and a log trough with moss on it beneath, for the horses?

A young boy is instinctively truthful but he doesn't always follow his instincts.

The war may be over but you're not over with the war.

Did you ever know any permanent improvement to be made in any situation by criticizing before others the one who was at fault? About all that such criticism does is to anger the subject of it. But there is still a class of imitation business men who scold their employes before others, thinking it impresses those about them with their importance.

Where the bolsheviks reign, blood pours.

Then there is the kind of "educated man" who thinks he has a good library if all the book covers match in color.

A great many men who agree in principle with the idea of "women and children first," wish the thing were not overdone in their own households.

The reason you are not contented with your lot is because nobody ever was until he became useless.

How Hog Cholera Is Controlled.

Through work of the Bureau of Animal Industry of the United States Department of Agriculture 5,500,000 hogs were vaccinated against cholera in the last year, and the average losses in cholera-infected herds were reduced to less than 13 per cent by the use of antihog-cholera serum. An increase of 168 counties working for hog-cholera control is considered notable, there being 467 counties in the country now engaged in this work, besides 17 States in which activities of this character are conducted.

Representatives of the Federal department visited 15,560 farms for the purpose of making investigations, diagnosing disease, and giving advice regarding control and eradication. Furthermore, 2056 meetings were attended by 100,190 farmers who were interested in the control and combating of hog cholera. In addition, 2,236 cholera-infested farms were cleaned up and disinfected under the direction of the Federal specialists.

In order that only the best antihog-cholera serum may be used in actual field work, rigid inspection of all serum is necessary. During the last 12 months, of the 271,402,536 cubic centimeters of serum produced in licensed establishments, 2,488,661 cubic centimeters were destroyed as unfit for use. Similar inspection of hog-cholera virus was also conducted for simultaneous use with the serum.

W. H. Cronk, hustling manager of Tum-A-Lum Lumber Co., was in Heppner for a short time on business Friday last.

Andy used to buy the biggest plug for the money

'till one day Barney gave him a chew of Real Gravely.

It was an hour or more before Andy said anything. "How much longer does this Gravely hold its good taste?" he says. "Two or three little squares last me all morning," an-

swers Barney. "This class of tobacco lasts so much longer it costs no more to chew it than ordinary plug costs."

It goes further—that's why you can get the good taste of this class of tobacco without extra cost.
