Oxy-Acetylene Welding

We weld anything except a broken heart.

The Gazette-Times Gives More Advertising Value for Each Dollar Expended for Space in Its Columns Than Any Other Available Medium. Let Us Prove It to You.

Put Your Surplus Straw Back On Your Land

The straw that you burn or use wastefully can be put back on your land with big profit. Properly spread, straw acts as a mulch on fall seeded crops. It prevents soil blowing, prevents winter killing, prevents winter sleet from smothering plants—and when turned under it has almost as much fertilizing value as manure.

Spread your straw—come in and get a John Deere Spreader with Straw Spreading attachment. Get double use and double profit from it. The John Deere Spreader with a Straw Spreading Attachment spreads straw and spreads

manure—does a fine, even job in either case.

One man operates the John Deere either when spreading straw or manure. After the machine is loaded, get on the seat, put the machine in gear, start the team or tractor, set the machine for heavy or light spreading as conditions require—that's all.

To take off the Straw Spreading Attachment for manure spreading is only a 30-minute job for one man. The change is quickly and easily made.

Don't attempt to get along another year without this profitable equipment.

Come in and let us show you an outfit that will pay for itself in a short time.

GILLIAM & BISBEE
Heppner, Oregon

Semi-Annual Report of the County Clerk of Morrow County, Oregon, for the Six Months Ending June 30th, 1919.

---And You Save One-Half

If you've ever had a summer outing spoiled by tire trouble, I'll bet you, too, would like to have puncture-proof tires on all four wheels.

Well, why not?

500,000 motorists are getting 5,000 to 10,000 more miles than they've ever had before from their casings, and are saving 1/2 on their tire bills—a lot of them are right here in our home town.

They are using Gates Half-Sole Tires—because they look better and are better—yet cost only 1/2 as much as other tires of corresponding size.

More than that, they're puncture proof.

We'd like to show you the Gates principle.

How about dropping around!
