"HE Buick Valve in-Head motor is, first of all, a cleancut motor. It acts cleanly, it concentrates, it becomes more efficient-because the cylinders of this motor are true cylindersthey have no side-pockets, no by-ways through which to lose power.

The full force of the explosion acts on the piston-head, where it conserves power. After each piston stroke the cylinders clear themselves of dead gas, so that they are filled with all fresh gas for each succeeding explosion.
