

JUNE BRIDE NOTES

A good looking bride deserves a good looking home

Every bride is entitled to a house as much as she is entitled to a wedding ring.

"You can't make a silk purse out of a sow's ear," nor can you make a home in a rented house. Buy a home for her wedding present.

Brides are entitled to something besides credit at the grocery store. Let her credit you with a home.

Share something with your bride besides a rent receipt. Live in a home of your own.

Your children won't understand the meaning of the Declaration of Independence in a rented house.

We haven't any ruined castles in Morrow county, but we have some buildings not nearly so old that look just as bad.

The face of nature takes on a new appearance when viewed from the porch of your own home.

Think it over and then look us up.

Power—and Where it Comes From

THE motor is nine-tenths of a motor car. The Buick Valve-in-Head motor is still built on a principle that was evolved when the motor car industry was originated. Every passing day adds proof that this principle is correct. It is a principle that is backed by scientific knowledge, by twenty years of successful manufacturing experience, and by a half million loyal, enthusiastic Buick owners.

Buick power, supplied by the matchless Buick Valve-in-Head motor, carries the Buick owner wherever he wants to go, slowly or quickly, quietly, steadily, irresistibly. In all things other than power the Buick is equal to the best. In power it stands alone.

Ask any one of the half million owners of Buick Valve-in-Head motor cars what it is about the Buick that most appeals to him. Invariably the answer will be—power.
