Two Hundred Million Dollars

Represents the amount which the public has paid for previous Maxwells.

The Greater Maxwell is now here

It is not a New Maxwell. It is in fundamentals the worthy descendant of 300,000 Maxwells that grace the highways of the world.

But before you set forth to look it over, let these facts sink into your mind:

It is a magnificent feat in engineering and building to be able to add so many new features to a car which has had a \$200,000,000 run.

That sum represents the amount paid for the one model Maxwell to date.

Stop and think what your dollar bought four years ago and what it buys now. About half.

Then think what a rare bargain in value alone you're getting in this car.

For no matter what price you pay you'll find difficulty in acquiring a car that will run longer, last longer and give you less trouble.

Your Banker Should Take Interest IN You as Well as FROM You

Truer words never were said. You, as an American farmer, are facing a new day—a day in which you will be a business man as you never before have been a business man, when the financing and executive side of your farm will demand just as much of your time and ability as the actual growing of crops and feeding of stock. There is a great deal of help that the banker can give the farmer in this reorganization of farming on a business basis. We place primary importance on co-operation with farmers on real business basis.
