Two Hundred Million Dollars

Represents the amount which the public has paid for previous Maxwells.

The Greater Maxwell is now here

It is not a New Maxwell. It is in fundamentals the worthy descendant of 300,000 Maxwells that grace the highways of the world.

But before you set forth to look it over, let these facts sink into your mind:

It is a magnificent feat in engineering and building to be able to add so many new features to a car which has a \$200,000,000 run.

That sum represents the amount paid for the one model Maxwell to date.

Stop and think what your dollar bought four years ago and what it buys now.

About half.

Then think what a rare bargain in value alone you're getting in this car.

For no matter what price you pay you'll find difficulty in acquiring a car that will run longer, last longer and give you less trouble.
