Wool Growing

The total wool clip for Oregon in 1919 was 14,000,000 pounds, of this amount Morrow county produced more than 1,500,000 pounds or about 12 per cent of the Oregon clip.

The climate and grazing conditions of Morrow county are particularly favorable for the raising of sheep, and with proper care can be materially increased.

The further development of this industry is vital to the future prosperity of this community and the First National Bank believes in extending woolgrowers all possible assistance.

YOUR OPPORTUNITY IS HERE

I have long since believed that one of the first and most necessary requisites for the upbuilding of a community is good wholesome water. Now that Heppner proposes to supply this factor, and having often been requested to sell building sites out of my East Side property, I have concluded to put it on the market for sale in lots and blocks, and the plat is now nearing completion under the supervision of Mr. S. C. Martin, a Civil Engineer of wide experience.

The tract is easily accessible, has a fine view and its subdivision makes it desirable as home sites. One of these days you will want a home in Heppner. Why not buy a lot now when it can be had at a reasonable price, on very easy terms, and in what is surely destined to be a most beautiful residential district.

If you have never walked up on the hill do so now. You will be surprised at the beauty of the location with a view scarcely anticipated, Mt. Hood being clearly outlined in the distance. Candidly, I am surprised and much gratified at the easy grades possible to reach the property, as worked out by Mr. Martin, who is on the ground, and who will be pleased to give any information concerning the plat.

Perhaps it is not entirely out of place to say that in platting this property I am as much interested in making it a beautiful home site as I am in the profit that may be realized, but I do not want any one to buy unless they feel it will be profitable to do so. Nevertheless, I have no hesitancy in saying that in my opinion, before you have made your last payment, under the liberal terms I propose to offer, the lots will have greatly enhanced in value.

Watch this space for subsequent information.

The New Frocks

TAFFETAS, clinging silks, crepe de chine and other fabrics—together with dainty laces, touches of metallic thread embroideries—of such stuffs are these new Springtime frocks. The colorings may be somber or gay, but in any event the frock that is chosen from this display will give its wearer unlimited satisfaction.

The Spring Suit

IT'S a difficult matter to choose between the many new modes, but one thing is certain—whatever style you choose will be strictly up-to-date. The style models are many and varied, but the value is there in every model shown.

NOT for many years has there been a season in which so many different sorts of innovations were apparent. Many of the modes of last Spring are with us again, together with a host of the styles that have been long forgotten.
