WATERWAY A
FACT UNDER
GOV. LOWDEN

Illinois Executive Carries Project
to Success After Others
Fail.

LINKS LAKES TO MISSISSIPPI

Improvement of Vast Importance to
Mississippi Valley and Northwest
—All Bars to Actual Con-
struction Removed.

One of the outstanding achievements
of Gov. Frank O. Lowden's adminis-
tration in Illinois was the putting
through of the Illinois waterways pro-
ject which will cost \$20,000,000 and
provide water connection between the
Great Lakes and the Mississippi river.
The project has been under discus-
sion for more than 20 years, and
several state administrations have
struggled in vain with this important
problem. It remained for Governor
Lowden to carry the great improve-
ment through to success.

The last bar to the project was re-
moved January 15 with the issuance
of a permit by the secretary of war
authorizing the state to proceed at
once with the improvement. The be-
ginning of actual construction work
is now but a matter of a short time,
and completion of the water link at
last becomes a visible goal. Tremendous
benefits will be realized by the
opening of the water route.

"The waterway will be of immense
value to farmers of the entire produc-
ing region of the great Mississippi
valley and the Northwest," Governor
Lowden said. "The Illinois project
will be in accord with the improve-
ment of the Mississippi, Ohio and Mis-
souri rivers by the federal govern-
ment for navigation. Locks will be 600
feet long, 110 feet wide, accommodat-
ing fleets of barges carrying 6,500 to
8,000 tons of freight, the equivalent
of six to eight average train loads.

"Before the war and the increase
of rail freight rates a ton of freight
was carried a thousand miles by wa-
ter as cheaply as fifty miles by rail.
This is a fair indication of the benefit
to be afforded the public by the work
when it is completed. Its value is
now enhanced by the government re-
quirement of interchange of freight by
railroad at suitable water terminal
points throughout the country."

The waterway will follow the
drainage canal from Chicago to Lock-
port from which the connection will
be made with the Illinois river at
Utica by a barge canal eight feet deep,
which may later be deepened to 14
feet, as conditions require. In addi-
tion to the great advantages to com-
merce, water power valued at approx-
imately \$1,000,000 a year will be devel-
oped which will effect a saving of ap-
proximately 200,000 tons of coal an-
nually.

The surveys and engineering work
for the improvement have been under
the direction of M. G. Barnes who,

during the Roosevelt administration,
designed for the government the struc-
ture of the Panama canal. Construction
work will be supervised by Frank
L. Bennett, director of the depart-
ment of public works and superintend-
ent of William L. Sackett, superintendent
of these officers state that much of the
preliminary work has already been ac-
complished. Funds for carrying on
the construction were provided
through the action of the last legisla-
ture authorizing the issuance of \$20-
000,000 bonds which have been af-
firmed by a vote of the people.

ECONOMY IN FUEL FOR DAIRY

Specialists Advise That All Waste
Steam Be Utilized During the
Current Winter.

(Prepared by the United States Depart-
ment of Agriculture.)
Many factory operations of the dairy
industry require the use of heat. Al-
though they demand little power. As
exhaust steam contains about 90 per
cent of its original heat, it can be
advantageously used in pasteurizing
milk and cream, and in sterilizing
dairy equipment in the average com-
mercial plant, according to specialists.
They advise that all dairy factory men
utilize this waste steam during the
current winter, when fuel may be
scarce and high in price. Information
on how to use steam effectively will
be furnished free of charge when re-
quest is made to the United States de-
partment of agriculture, Washington,
D. C.

WATER FOR COWS IN WINTER

If Highest Production is to Be Main-
tained Drinking Water Must
Be Warmed.

Cows frequently refuse to drink the
water in an icy trough. A cow must
be thirsty, indeed, before she will fill
herself with freezing water. It is
necessary, in view of the fact that
milk contains about 87 per cent water,
to warm the drinking water for dairy
cows if highest possible production is
to be maintained. Unless the cow
drinks a sufficient quantity of water
her milk production will diminish,
and she will not drink enough unless it
is warm. Suitable shelter from cold rains
and rough winds is another comfort
which the cow will require in milk.

lar! Yes that was the estimate I
gave you."

"Nothing," replied the stranger
quietly. "I only came in to connect

Is Your Hook Baited
Right?
For every species of fish and condition of water there is
the proper bait which, when used, will give the greatest num-
ber of funny beauties in the basket at the end of the day's sport.
The wise angler acquaints himself with this lore and his efforts
are productive of greater results than the one who uses any
kind of bait for any kind of fish in any kind of water.
Just so, there are in every locality certain ways for the mer-
chant to increase his sales and among these advertising stands
out preeminently. But the wise advertiser soon learns that ad-
vertising in itself will produce but few results if the medium
used is not the best. In Heppner, close attention to the me-
diums the advertiser has at his command shows conclusively
that The Gazette-Times is the choice of local advertisers, and
what is just as significant, the choice of large national adver-
tisers, with whom advertising is a science and who judge a me-
dium solely by the standard of the results obtained. That
these large contracts are renewed every year is one of the
strongest recommendations of the effectiveness of G-T adver-
tisiny.
Place your advertising in The Gazette-Times and your
judgment will be vindicated by the results obtained.
