You gain an advantage—

You gain an advantage in the resources, experience, knowledge and equipment of the Standard Oil Company, which combine to make Zerolene an oil of quality. They create an efficiency in the manufacture of fine lubricants hard to duplicate elsewhere in the world.

Use Zerolene for the correct lubrication of your automobile, truck or tractor.

For the Young Business Man

Some day the young business man will be a big business man.

Right now, perhaps, there isn't any money profit in carrying his checking account. But some day, as that account grows, and as the owner grows with it, the bank will be repaid for having counseled the young man and cooperated with him in his business success.

So, this bank invites the young business man who wishes to grow. We have seen many a small account grow into a large one and have earned the thanks for helpful service cheerfully rendered at all times.

We want your account. But, what is more, we want you as a growing business man to associate yourself with this bank.

A Busy Lawmaker

HON. PHILIP PITT CAMPBELL

Representative Campbell, of Kansas, occupies the important position of chairman of the Committee on Rules and is a busy man, as his committee is in session almost daily. He is the author of the bill just reported out by the House Committee on Labor creating a Woman's Bureau in the Department of Labor. This is a measure to formulate standards and policies which shall promote the welfare of wage-earning women, improve their working conditions, increase their efficiency and advance their opportunities for profitable employment. It will affect about 20,000,000 women employed in the industrial life of the country.

Mr. Campbell made the opening speech in support of the resolution to declare the war at an end.

Farm Reminders

Seasonal Suggestions on Things Often Overlooked, as Seen by the State Agricultural College.

DAIRY, O. A. C.: One acre of corn put into the silo and fed as silage is equal to two and four-tenths acres made into fodder and fed as dry roughage. It is a poor policy to turn your bull in the pasture, better to keep him in the lot than to be sorry. A gentle bull is like an unloaded gun. A man with plenty of good silage and good legums hay is independent of the high cost of grain.

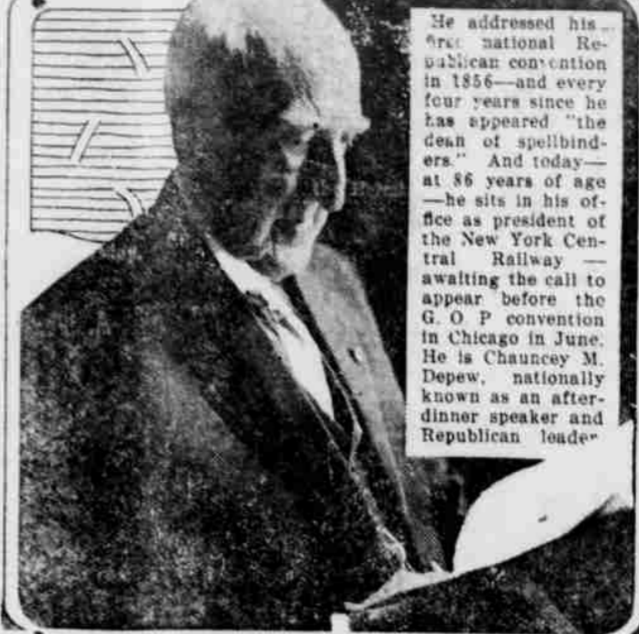

HORTICULTURE, O. A. C.: C. I. Lewis, former chief of the department of horticulture of the college addressed the freshmen of the college on the benefits of cooperation.

HON. JOHN I. NOLAN

California furnishes the chairman of the Committee on Patents in the House in Representative Nolan. He has succeeded in increasing the pay of efficient and expert patent office employees. He also pushed to passage bills to amend the copyright act and to amend the trade-mark act and to give effect to certain provisions of the convention for the protection of trade-marks and commercial names made and signed in the city of Buenos Aires. Representative Nolan, who is a stalwart Republican, also ranks second on the House Committee on Labor. He is author of the Nolan minimum wage bill.

DEPEW AT 86 AWAITS G. O. P. CALL TO SPEAK

He addressed his first national Republican convention in 1856—and every four years since he has appeared "the dean of spellbinders." And today—at 86 years of age—he sits in his office as president of the New York Central Railway—awaiting the call to appear before the G. O. P. convention in Chicago in June. He is Chauncey M. DePew, nationally known as an after-dinner speaker and Republican leader.

and advertising. He advised all farmers to make use of the newspaper to advertise farm products.

Balanced Rations Help. The following ration for a laying hen for one year is recommended by James Dryden, chief of poultry husbandry at the O. A. C. experiment station: Wheat, 25 pounds; oats, 15; mill run, 20; ground oats or barley, 5; linseed oil meal, 5; meat or fish scrap, 7; kale or other greens, 45; bone, 2; grit, 3; shell, 2; charcoal, 2. The meat scrap may be displaced with 60 pounds of buttermilk or skim milk. Corn may be substituted for part of the wheat, at present prices.

Peach Cull Pest Control. Peach growers who find trees suffering from peach leaf curl in the spring will have to postpone control by the Bordeaux mixture until the next winter, says Prof. H. P. Barrs, pathologist of the O. A. C. experiment station. To be effective the remedy should be applied not later than the middle of February. Directions for making and using this spray will be sent by the college to growers on request.

It's Fun to Keep House. It's just fun to live, and house-keeping is no drudgery to one who

has had the practice house training and course in house administration at O. A. C. At least that is what Mrs. S. B. Romans, a graduate of 1913, writes to her instructor, Miss A. Grace Johnson. The way she keeps the house looking—a big one of eight rooms fixed over—makes people inquire about her maid, but she has none. She does all her own work, including the family washing. And likes it, too.

Jardine New Director. The state experiment station at O. A. C. and the seven branch stations in the different Oregon districts, are to have for director James T. Jardine, a research specialist in the U. S. department of agriculture. He succeeds Dr. A. B. Cordley, who has served as both director of station work and dean of agriculture ever since James Withycombe withdrew to fill the governor's chair. The school of agriculture has grown to 43 staff members and 888 students, and the station work has been extended until each require the entire time of an

CARD OF THANKS
We take this method of thanking our many friends and neighbors who worked so heroically during the fire for we realize it was by your effort that more of our property was saved from the flames.
MR. AND MRS. ADAM BLAHM.

TALLEST MAN IN THE WORLD COMES TO U. S.

The tallest man in the world has arrived in America. He is John Van Albert of Amsterdam, Holland, who is 8 feet 5 inches tall. He comes to John an American circus. He is of normal proportions despite his abnormal size. He wears a 14 glove, a 14 hat and No. 12 shoes. No stateroom was large enough for him on the boat he came on, so he was forced to sleep in the companionway on two cots placed end to end.

DOWN TO SPIVING TAILOR SHOP - \$2 A WEEK!!

THAT'S FINE - MIGHTY FINE!! AND WHAT'S YOUR CHANCE OF RISING?

OH SWELL!! THE SHOP IS UPSTAIRS OVER THE YEAST FACTORY!!

A Boy Can Run a John Deere Dain Mower

While you are getting things in shape for making hay, put your boy on the John Deere Mower and let him do the cutting—he will do it just as well and just as easily as you can do it.

Because of the powerful lift, he can easily raise the cutter bar to pass over any field obstruction or to extreme height, when necessary. A foot lever working in conjunction with the hand lever, makes the lift simple and easy.

He will never have to back up to get a start, even in the heaviest hay. The knife starts cutting the instant the mower is thrown in gear—no lost motion. You will see big advantages in the drive on this machine—it's extremely simple—the gears are so placed that one set holds the other set in mesh constantly. The John Deere will cut all of the grass for years to come—a simple adjustment takes up all lag in the cutter bar, without affecting the centering of the knife. If the knife ever needs re-centering, a special adjustment is provided. The John Deere is the simplest, most powerful and best-built mower we have ever seen. We know it will appeal to you.
