Farmers & Stockmen It's Like This

If you are inclined to sell your ranches at all, now is the time, when everybody wants to buy. If you want to retire and take things easier for awhile, take advantage of the present conditions and list your land with me at once. Let the other fellow or the younger men do the work and make the money for a while. The change will give you new pep and a more vigorous, enthusiastic grip upon life.

After several months of careful effort, I have secured a large list of outside buyers who will be here within the next 90 days to look at your land.

Every Oregon Boy and Every Oregon Girl Is a possible College Student

Oregon sends a bigger percentage of its children to college than any other state, without exception.

That is one of the State's proudest records

No state can have too much education. Education is the safeguard of freedom and of right, and higher education is the capstone of the public school system. But higher education in Oregon is in great danger. The State University and the Agricultural College have twice as many students as they have income to train.

Protect these Schools and their great work

by voting on May 21 for the Higher Educational relief measure. Higher Education pays the state in dollars and cents, in improved living, in scientific progress, in farm, orchard, garden, and stock ranch development, and in the better quality of its public and high school teaching.
