

DUTCH APHIS COMES ON BUT IS DUE FOR SETBACK

Natural Enemies Said By Entomologist to be Busy Breeding Aphid-eating Worm Crop.

O. A. C. Experiment Station, June 1.—The vetch aphid is showing up on the growing crop again this spring in sufficient number to cause considerable alarm," says A. L. Lovett, entomologist of the O. A. C. experiment station.

"Numerous inquiries are coming to me regarding the possible outcome of the present infestation. Following a fairly comprehensive survey of the situation we can say that we do not anticipate any such calamity as befell the vetch fields two years ago.

"Observation indicate that the presence of natural enemies in the field is sufficient to check any considerable increase in the present number of aphids. It is true that the lady bird beetles which aided so materially in the final control of the aphids two years ago are absent from the field at this time, but a syrphus fly, such as checked the vetch aphid outbreak in 1912 so successfully, is now present in the fields in numbers busily depositing eggs.

"It is rather difficult to find any considerable group of aphids where a number of these small, elongated white eggs are not present on the surface of the leaves in the immediate vicinity. The maggot hatching from these eggs is a long greenish pointed creature and feeds voraciously on aphids. In confinement they have been observed to devour more than one per minute or over 60 per hour.

"If the present warm weather continues it is reasonable to suppose that these natural enemies will be able to develop and effectively check and control the present aphid outbreak."

Grimm Alfalfa

During the past month the Morrow County Farm Bureau has shipped in about fifteen hundred pounds of Grimm alfalfa seed. While the price has been quite high that we have been forced to pay, the grade vitality of the seed and the fact that you do not have to sow as many pounds per acre, do not make this any more expensive for seeding than the ordinary variety. It is certainly true that the yields which are received from this alfalfa are far superior to that of any of the other varieties. The increased yield by this variety is variously estimated anywhere from 20 to 50 per cent, depending upon the adaptability and soil conditions. This is enough to make it clearly worth while. It has another great advantage in view of the fact that its wide rooting system makes it possible to get along on a great deal less moisture. This makes it greatly preferred where the irrigation water is short. Another advantage is that the crown of the alfalfa is below the surface of the ground while on the ordinary variety it is up on top. This makes it less liable to winter killing. If the grasshoppers should infect the alfalfa fields in the future as they have in the past this would also be to their advantage as the grasshoppers would not be able to eat into the ground to get at the Grimm alfalfa crown. There is no question but that this will give great deal better results than the ordinary alfalfa seed, which was heretofore grown.

LOST—Pair of child's horn-rimmed glasses. Reward. Finder leave at Gazette-Times office.

Christian Science.

Christian Science services are held every Sunday morning at 11:00 o'clock in the lodge room in the I. O. O. F. building.

Testimony meetings are held every Wednesday evening at 8:00 o'clock at the home of Mrs. Eugene Slocum. All interested are invited to attend these services.

DAKOTA STATESMAN

Hon. Porter James McCumber.

This eminent Republican from North Dakota is chairman of the Pension Committee of the Senate. As such he had charge of the Fuller pension bill in the upper branch of Congress. It recently passed that body, was agreed to in conference and has become a law. It provides for large increases in pensions to veterans of the Civil War and widows of the veterans of that war and also applies to the widows of the War of 1812 and to Mexican War veterans and widows.

GARY KNOCKS THE "VICE" OUT OF SERVICE.

SERVICE has been the "hunger" of motor truck users in years gone by. And even today there are a number of makes of trucks "sold on price" that in a measure require maintaining a repair shop for each truck to keep it on the road.

Gary trucks have revolutionized service requirements, being correctly designed, and evenly balanced, and built of the highest class of standardized units. Gary trucks require no service—except in case of accident.

We can point to Gary trucks that have entirely worn out a set of solid tires, over rough country roads, without ever having been in a repair shop or having any work done by a mechanic. When continued usage necessitates the replacement of parts of the standard units, of which the Gary is built, they can be obtained and installed by any capable repair man at the minimum cost.

There is nothing mysterious or freakish about a Gary truck. Your nearest mechanic knows every unit of its construction. Buda motors, Timkin axles, Timkin bearings, Timkin-David Brown worm drive, Brown-Lipe and Fuller & Sons transmission and Parish & Bingham frame are exclusively employed in the construction of Gary trucks.

Send for catalogues, specifications and prices and learn the advantages offered to buyers of Gary trucks. Gary Coast Agency, 71 Broadway, Portland, Oregon.

Also any person or persons found leaving gates open or in any way molesting fences for purpose of going through our ranges will be dealt with according to law.

A. HENRIKSEN, R. A. THOMPSON, C. A. MINOR, MOLLAHAN BROTHERS.

Brunswick Principles In Fine Tire Making

The reason you are interested in the name on your tire is that it identifies the maker. By knowing the maker you can judge his ideals of manufacture.

The only secret of a super-tire lies in the principles of the maker. His standards decide the quality. For there are no secrets in the tire industry.

What you get depends on what is behind the name on your tire. Brunswick, as you know, means a very old concern, jealous of its good name. Since 1845 the House of Brunswick has been famous the world over for the quality of its products.

The Brunswick Tire is all that you expect—and more. Your first one will be a revelation. You'll agree that you've never known a better. And you'll tell your friends. So spreads the news among motorists. The Brunswick is the most welcome tire that ever came to market.

Try one Brunswick Tire. Learn how good a tire can be built. And remember, it costs no more than like-type tires.

Another Royal Suggestion

BISCUITS, BUNS and ROLLS

From the NEW ROYAL COOK BOOK

BISCUIT! What delight this word suggests. So tender they fairly melt in the mouth, and of such glorious flavor that the appetite is never satisfied. These are the kind of biscuits anyone can make with Royal Baking Powder and these unusual recipes.

Biscuits

2 cups flour
4 teaspoons Royal Baking Powder
1/2 teaspoon salt
2 tablespoons shortening
1/2 cup milk or half milk and half water

Sift together flour, baking powder and salt; add shortening and rub in very lightly; add liquid slowly; roll or pat on floured board to about one inch in thickness (dumplings as little as possible); cut with biscuit cutter. Bake in hot oven 15 to 20 minutes.

Royal Cinnamon Buns

2 1/2 cups flour
1/2 teaspoon salt
4 teaspoons Royal Baking Powder
1/2 cup water
1/2 cup sugar
2 teaspoons cinnamon
4 tablespoons seeded raisins

Sift 2 1/2 tablespoons of measured sugar with flour, salt and baking powder; rub shortening in lightly; add beaten egg to water and add slowly. Roll out 1/4 inch

thick on floured board; brush with melted butter, sprinkle with sugar, cinnamon and raisins. Roll as for jelly roll; cut into 1/2 inch pieces; place with cut edges up on well-greased pan; sprinkle with a little sugar and cinnamon. Bake in moderate oven 20 to 25 minutes; remove from pan at once.

Parker House Rolls

4 cups flour
1 teaspoon salt
4 teaspoons Royal Baking Powder
2 tablespoons shortening
1/2 cup milk

Sift flour, salt and baking powder together. Add melted shortening to mix and add slowly to dry ingredients stirring until smooth. Knead lightly on floured board and roll out 1/4 inch thick. Cut with biscuit cutter. Grease each circle with back of knife one side of center. Butter the small section and fold larger part well over the small. Place one inch apart in greased pan. Allow to stand 15 minutes in warm place. Brush each with melted butter and bake in moderate oven 15 to 20 minutes.
