#### Harding and Coolidge

Republican delegates at Chicago had vious easons. How many of the other the sense and good judgment to name 95 per cent care about those things? as the party's candidates two preeminent Americans of such sterling worth and high character as Warren G. Harding of Ohio and Calvin Coolldge of Massachusetts.

Senator Harding is not known in the West as he is in the East, and yet every citizen who has followed the trend of current events cours not help but know that the Senator is a tower of strength, not only to the party but to the Nation. We firmly believe that Western people will learn to know better, in the coming months, of the man who has been chosen to the leadership of the party, and let us hope, the leadership of America.

The Ohio Senator is a middle of the road man. He cannot be classed progressive, although he stood with Roosevelt on a number of large questions, such as preparedness; and on the other hand he is too much up and coming to be put with the stand-patters, more especially that delightful democratic term, "the old Guard." Almost before the wires got cold some of our democratic friends were hastening forward with the information that all was not well in the republican camp, that the nominee was no harm.

There appears to be nothing but commendation for Senator Harding's ning. His record has been one of intense service, and his record in Conthe convention. The cry of "Hard-

the November election. Governor Coolidge was unanimous-Ho momod

Tenantry Is Awful in the Cities There is no doubt that a change

ust come in home-owning in this country if the mass of our people are to be true blue, patriotic American HERWEIS. It has long been a matter of serious

alarm that fenantry was increasing in the country. We know that a tenant cannot have the complete interest we would like him to have in the soil he works and the buildings he uses. Ownership alone gives the real interthat makes for continued fertility his land and for upkeep and imovement of farm house and farm ildings.

It is the same, only with a differ-it twist, in the cities. We have not greatly agitated ourselves about them, however, because we have carelessly felt that tenantry was the natural thing in the cities. But if it is the natural thing, it shouldn't be. The man with a five-room house and a lot 40x125 is a good deal different sort of a citizen of this republic to the man who rents. Ownership counts. Think, ye home owners, of the situation in New York City, of the 6,100,-000 residents, only 300,000 own their homes, or less than 5 per cent. That 5 per cent is interested in good, orit is gratifying to know that the derly, patriotic government for ob-

#### The Gasoline Situation

What is the cause of the gasoline hortage? The Pendleton Tribune asks the same question that has been

m the lips of many persons for several weeks. Is it real, or is it artificial? Is the whole famine in the gasoline world created by profiteers? Many are coming to believe that he outcome must be government wnership, control and operation of the oil wells, pipe lines and distributing agencies.

Continuing, says the Tribune, until me new source of power has been discovered, the public interest in petroleum is all important. Its products are essential to light, heat and power. In a thousand avenues the call is loud for the divers resultants of crude oil. A thing in which so large a portion

ate interests to control.

#### -1-1-The Price Slump

Not breakers-just the signal of danger ahead! Sounds and signs that call for careful steering, a close

following of charted seas. The tumble of prices caused by the nation-wide unloading of stocks, succeeding credit restrictions enforced by the banks, has caused a wholesale hand-picked by the Old Guard, and misgiving as to what the future will hints of Wall Street were made, bring. But the soundest of financial Such talk will do Senator Harding horoscopists see nothing particularly alarming in this run to cover. They do, however, read into the event the

vital need of value readjustmentspolitical activities from the begin- new relations of price to quality. And it is just about time that a change should be effected. The ungress is an open book.
