

The Oil for your tractor

The resources, experience, knowledge and equipment of the Standard Oil Company combine to make Zerolene an oil of quality. They create an efficiency in the manufacture of fine lubricants hard to duplicate elsewhere in the world.

Our Board of Lubrication Engineers has studied your particular type of tractor and provided for its correct lubrication. Their recommendations for the correct lubrication of automobiles, trucks and tractors are available in booklet form. Ask your dealer for your copy.

STATE NEWS - - - SPECIAL FEATURE SECTION

Under this Heading Each Week Will be Found Up-to-the-Minute News of the World in Picture and Text, Showing the Doings of the Great, the Near-Great and Those Who Are Striving to Become Great.—Items of General News Interest Gathered From Over the State at Large.—Women's Activities and Fashions.—Humor From the Leading Humorous Papers.

CLOTHING PRICES DROP!—SUIT FOR 15C

The high price of clothing is largely responsible for the manufacture of a number of paper articles imported from Austria and Germany. Chief among these is an all-paper suit that retails at the nominal sum of 15 cents.

These articles have become popular in parts of Europe, especially where clothing is worn more for service than appearance. Tablecloths, rugs, etc., are also among the paper articles. The design and color is similar to those now in use.

Eastern Oregon Offers Fine Dairying Fields

Irrigated Alfalfa Districts Said by Specialist to Be About Right For Big Industry.

Oregon Agricultural College, Corvallis, Sept. 22.—Eastern Oregon irrigated districts offer splendid opportunities for dairying.

LAW IS LAW—AND HE WINS FOR FINLAND

H. Kolehmainen, the famous runner, was not allowed to represent the United States at the Olympic games, so he ran under Finnish colors and won the classics.

It was discovered that although he has lived in this country eight years since his great triumphs in the 5000 and 10,000-meter races and cross-country in 1912, he is not yet naturalized. He is shown here decorated at the recent Olympic games with the classic wreath of laurel leaves. The speed boy looks as though he felt about as comfortable with that wreath as Huckleberry Finn.

“Titles for successful dairying,” says E. B. Flitts, U. S. and O. A. C. dairy field specialist. “The climate is favorable and an abundance of the right kind of feed is produced.”

Alfalfa Cheapest and Best. “The dairy cow for maximum profitable production must have a liberal amount of protein. One of the cheap-

est and best sources is alfalfa hay. Experienced dairymen everywhere recognize its value and feed large amounts of it even in places far distant from point of production.

“This adds expense of handling, baling, freight and commission or selling costs to the cost of the hay where it is grown. Even with these added costs it is still the cheapest feed they can buy, and the handicap does not force them out of the business.”

Cow Changes Hay to Milk.

“Dairying is a manufacturing enterprise with the cow converting raw material—hay—into concentrated product—milk. The nearer the plant is to the source of materials supply, the greater opportunity for profit.

“Alfalfa thrives luxuriantly in the irrigated regions, and corn, or sunflowers in the higher belts, does well and provides succulence of an ideal nature as silage.

“Alfalfa hay and silage make a dairy ration second to none, and with them grain feeding is reduced to a minimum.”

Change of Heart.

Rastus, in his best Sunday-go-to-meet'n' black suit, was about to start for church when stopped by his tearful spouse.

“Rastus,” she mourned, “kain't go to Mefodist chu'ch no more. Done had religion changed by de 'thorit-

ies.”

“How come, woman, how come? ‘Thorities ain't got nothin' 'gainst Mefodist chu'ch. Dey kain't change you' religion.”

“Kain't, hey?” sniffed his spouse. “Dey done it. Census man comes to house the other day and asks what chu'ch we go to. Ah says, ‘Mefodist’ and he writes down, ‘Protestant.’ Now we-all got to find ourse'ves the Protestant chu'ch.”

An Irishman who was rather too fond of strong drink was asked by the parish priest:

“My son, how do you expect to get into heaven?”

DAINTY SCHOOL DRES.

The garment illustrated makes up into a very attractive and serviceable school dress in chambray. The collar, cuffs and belt are piped with any contrasting color which gives it pleasing finish. The skirt is plaited, front and back and contains two pockets that are useful in school clothes.

The Irishman replied:

“Sure, and that's aisy! When I get to the gates of heaven I'll open the door and shut the door, and open the door and shut the door, and keep doing that till St. Peter gets impatient and says, ‘For goodness' sake, Mike, either come in or stay out!’”

M. O. Bennett, state highway engineer for Walla Walla, Union, Umatilla, Morrow, Wheeler and a part of Grant counties for the past four years, has resigned and left for Lewiston, Mont., where he will start farming on a large scale. Roland Oliver of Pendleton and Mr. Bennett have taken an eight-year lease on 2000 acres of wheat land near Lewiston.

CANNING DAYS GONE—THEY FREEZE IT NOW

The experimental department on agriculture has decided that the hot swelter-hours put in over a cookstove at canning time are soon to be forgotten. Science says that fruit can successfully be stored for months by freezing as low as ten degrees Fahrenheit or higher up to thirty-two and stored in a temperature equally low. The picture shows results of a three-month freezing test recently made, which proved more economical and generally more satisfactory than the old boiling methods.
