

ANTI-COMPULSORY VACCINATION MEASURE

At the election, November 2, the voters of Oregon must decide on a question of the most vital importance to the health of this state. On the ballot there will be—Number 313—a bill, entitled, "Anti-Compulsory vaccination amendment."

While this proposed measure purports, upon its face, to be a bill designed to prevent so-called under-compulsory activities on the part of health officers as at present constituted, its provisions are declared by competent legal advisers absolutely to tie the hands of these health officers, so that, in case of an epidemic of disease of any kind—no matter how serious to a community—no stringent measures could be lawfully taken to protect the people.

Officials of the cities and counties and even the Governor, would be stopped from compelling vaccination or inoculation in the gravest of epidemics, should this bill become the law of Oregon, it is held by lawyers of the highest standing.

All of the progressive work of the State Board of Health and any association of people organized for the purpose of disease prevention would be rendered helpless under the provisions of this proposed law, for even the curbing of venereal diseases, now being so successfully carried on for the general public welfare, would be ruined.

All of the experience of ages, gathered at terrible cost to human life—all efforts at preventable objective would be annulled, if this proposed measure should become the law of the state. While purporting to go only to the extent of accomplishing the prevention of compulsory vaccination, its language would prohibit the enforcement of measures long known to be necessary in the protection of the people.

The best authorities on health legis-

lation and the best legal talent of the state are agreed that, should this measure receive a majority vote of the people, the result would be ruinous to public health.

A GRAVE HEALTH MENACE

Whatever view one may take upon the straight question of vaccination, it would seem, after careful perusal of the so-called "Anti-Compulsory Vaccination Amendment," on the ballot for November 2, that it should be defeated by an overwhelming majority because of its iniquitous over-reaching provisions, cloaked under a misleading title.

Competent authorities, both legal and medical, who have gone into this bill, declare it to be all-inclusive as to its effect, if adopted by the voters, on the subject of prevention of diseases, no matter of what nature. That it robs the authorities, duly constituted, of power to act, even in an epidemic emergency, is the declaration of men and women who have given it the most careful scrutiny.

Read carefully the following excerpt from this bill and determine for yourself what it means:

"No form of vaccination, inoculation or other medication shall be made a condition in this state for admission to or attendance in any public school, college, university or other educational institution; or for the employment of any person in any capacity or for the exercise of any right, the performance of any duty or the enjoyment of any privilege."

Under the provisions thus stated, if the English language means anything, compulsory vaccination, even in the gravest emergency, would be prohibited in the case of typhoid, paratyphoid, rabies, tetanus (lock-jaw), bubonic plague, whooping-cough, and any other disease, including the most dan-

gerous and loathsome venereal disorders.

In short, it would absolutely render powerless the hands of the authorities in every city and county of Oregon, if it became a law.

A worse calamity could scarcely be conceived.

This more or less innocent appearing title is No. 313 on the ballot, labeled "Anti-Vaccination Amendment."

Vote it NO in capital letters.

All of the armies and navies of the world have found vaccination and inoculation of untold value in saving life, but the framers of the misnamed

"Anti-Compulsory Vaccination Amendment," to be voted upon at the election November 2, discount all of that experience and testimony.

Rooster Just Like Mother.

Winsted, Conn.—A prancing Rhode Island Red rooster owned by Elmer Robbins is brooding a number of chickens that weigh from one and a half to two pounds each. The young rooster also fills a mother's role by calling the chicks when he uncovers worms. At night the chickens huddle beneath his wings.

Red Crown gasoline has a continuous chain of boiling points. It is an all-refinery gasoline.

WARNING!

On November 2nd you will be required to vote on the so-called Oleomargarine bill. The instigators of this vicious measure would have you believe that its purpose is to regulate and license.

THE REAL PURPOSE IS TO KILL A GREAT OREGON INDUSTRY

It is directed against the manufacture and sale of Oleomargarine, Nut-margarine and all the many kinds of spreads used for bread by thousands of people in our state who cannot afford to pay the price of butter.

Facts to Remember!

1 The OLEOMARGARINE BILL will not in any way benefit the Dairy industry of Oregon by the implied strengthening of the market or increasing the consumption of dairy products.

2 The local butter industry is entirely regulated by national demand and the manufacture and sale of Oleomargarine and Nutmargarine can never, in the least, affect the dairy industry in the state.

3 Further state legislation in the form of the so-called Oleomargarine Bill is not necessary because the Government already has 79 pages of regulatory and licensing laws governing the operation of this legitimate industry. Deception and fraud are impossible.

4 The Oleomargarine Bill is an attempt to dictate to you what you shall or shall not purchase in the way of a spread for your bread.

As a Citizen of Oregon You Need the Port of Portland

If you owned a store you could not make a big success unless your business methods were as modern as your competitors'. Unless Oregon develops her shipping facilities she cannot expect to get her share of the world's business. It rests with the citizens of this state whether Oregon shall develop her wonderful resources and reach out for bigger markets, or remain practically an inland state.

To become a real port, a 30 foot channel must be dredged in the Columbia and Willamette Rivers from Portland to the Pacific Ocean. This will enable farmers and stockmen and lumbermen in the interior of the state to reach the markets of the world at a lower freight rate and greater profit to themselves.

The taxing and bonding power to make these improvements can be granted the Port of Portland only by the people of the state. You and every other citizen will benefit if you, on November second,

Dr. Harvey W. Wiley Says "Vote 313 No"

Speaking before the Members' Forum of the Portland Chamber of Commerce, Dr. Wiley, formerly head of the Government's pure food bureau and known as the "Father of the Pure Food Laws," declared that the title of the bill was a misnomer and that it should be called "a bill for the increase in mortality in children."

"Never before have I been in a community where matters pertaining to public health have been taken out of the hands of experts and put to a vote before the people," declared Dr. Wiley. "I do not think that a parent in this state who has children of school age will vote for this measure, because it means that the school children will not be protected against contagious diseases."

Smart Hosiery For Women

HOLE-PROOF HOSIERY has not only the dash and style, but also a lasting wearing quality which has made the name HOLEPROOF a by-word among discerning people who want quality.

We carry a complete line of hosiery in prices ranging from \$1 up

Sam Hughes Company

It Lasts

Threaded Rubber Insulation has to stand a test as severe as the test of a lineman's rubber gloves.

After such a test you can be sure it will protect the plates and last as long as the battery.

Threaded Rubber Insulation makes "bone dry" shipment and storage of batteries possible. The Still Better Willard Battery—the only battery with Threaded Rubber Insulation—has been selected by 135 manufacturers of cars and trucks.
