New Crank Case Service for Motorists

YOU probably know that after a few weeks of driving your lubricating oil becomes dirty with carbon, road dust and fine particles of metal, which circulate through your engine and cause unnecessary wear on bearing surfaces. And gasoline escapes past the pistons and dilutes the oil. Granted. There's nothing new about that—but—

Here's an absolutely new way to get rid of this dirty, diluted oil and put your engine in line for better performance and longer life. It is called Modern Crankcase Cleaning Service.

Modern,—because we use Calol Flushing Oil, the new, scientific,

thorough flushing agent that does not contaminate the fresh oil.

Our skilled mechanics know how to clean out a crankcase with it correctly and quickly, at a nominal cost to you.

This service assures proper lubrication for your cleaned engine. We refill the crankcase with fresh Zerolene of the correct grade.

We recommend Modern Crankcase Cleaning Service as the latest word for better engine operation and longer life for your car.

TODAY: Bring in your car for Modern Crankcase Cleaning Service.
