### GETTING THE SHORTHORN INTO AFRICA

The American thoroughbred stock-breeder, who thinks he encounters trials and adverse conditions, is invited to take a look at this picture. It shows the difficulties of the South African breeder in trying to introduce the shorthorn into Northern Rhodesia, and a plan recently adopted in getting shorthorn bulls from the Union of South Africa, through the Teste-fly country. The animals are enveloped in a specially constructed khaki mackintosh, leaving only the eyes, horn and nose exposed. The exposed parts are covered with wagon grease and the herd marches only by night when the fly is less on the wing. The native cows are then bred to the shorthorn.

### HEY, LEGION! WANT TO HELP THIS BUDDIE?

Does the local post of the American Legion want to adopt this French war orphan, Alfred Picaud, now 8 years old? It costs only \$75 a year; keeps Alfred in school and permits his mother, a struggling seamstress, to have him with her. ## "NOW-A-DAYS"

says the Good Judge

A man can get a heap more satisfaction from a small chew of this class of tobacco, than he ever could get from a big chew of the old kind. He finds it costs less, too. The good tobacco taste lasts so much longer he doesn't need to have a fresh chew nearly as often.

Any man who uses the Real Tobacco Chew will tell you that.
