The Gift of Gifts

THERE is no better gift for the ambitious boy or girl than the gift of saving. And saving is largely a matter of getting started right and that is where you can help. A dollar or more deposited in this bank will start a savings account for your boy or girl, or some young friend. And the pass-book, with its first entry, will make a great hit on Christmas morning. In after years your gift will have repaid itself a thousandfold.

Step in next time you are passing. We have something of real interest to say to you on the gift of saving—the gift of gifts.

FRIENDS

I used to watch for Santa Claus
With childish faith sublime,
And listen in the snowy night
To hear his sleigh-bells chime.
Beside the door on Christmas Eve
I put a truss of hay,
To feed the prancing, dancing steeds
That sped him on his way.

If children of a larger growth
Could have a Christmas tree
From Father Time, one gift alone
Would be enough for me—
Let others take the gems and gold,
And trifles light and vain,
But give me back my old belief
In Santa Claus again!

Farm and Home Pointers
Fattening lambs were fed all the alfalfa they could be induced to eat in the experimental tests at the Union branch station, with a grain ration as follows: Started on a feed of one fourth pound of whole barley a day, which was gradually increased to one pound per day at the end of the eighth day. This was the amount fed for the remainder of the test, 90 days. The 130 lambs under shelter gained 29.3

WOMEN HEARD AT FARM BUREAU CONVENTION

Woman already has her place in the ranks of American Farm Bureau Federation. These two, Mrs. John C. Ketcham of Hastings, Mich., and Mrs. C. W. Sewell of Otterbein, Ind., appeared before the Farm Bureau National Convention at Indianapolis last week, both scoring decided hits in the message they carried. Mrs. Ketcham is one of the two women in the U. S. who are members of the executive committee. She is a director of the Michigan State Farm Bureau. Mrs. Sewell dropped her house work on her farm to talk on Home-building.

WILL GUARD HEALTH OF NEXT PRESIDENT

This little man, Dr. Charles E. Sawyer, Marion, O., is slated to fill the place now occupied by Dr. Carey E. Grayson. He is to be personal physician to President-elect Harding. Dr. Sawyer has been a close personal friend and neighbor to the Hardings for many years. Dr. Sawyer made the recent trip with the president-elect to Texas, Panama Canal and back to Washington.

pounds, average, and these in open lots 22.2—O. A. C. Experiment Station.

The Portland press announces receipt at that port of large shipments of nitrates, which will be used in Oregon orchards. Growers can learn much that the state experiment station has found out about orchard fertility by sending for the station bulletin, "Fertilizers for Oregon Orchards"—Horticulture, O. A. C.

Soiling, pasture and stlage are used to supplement one another on many well-managed Oregon stock farms. Together they make possible the feeding of succulent feeds all seasons of the year.—Farm Crops, O. A. C.

STADIUM GIRL FOR OLYMPIC IN OHIO

It's rather hard to associate a beautiful young lady like Miss Eloise Fromme of Urbana, O., with the 1924 Olympic athletic games. Nevertheless Columbus (O.) citizens working hand in hand with faculty and athletic leaders of Ohio State University had this young lady lead them in a drive for \$1,000,000 to erect a new athletic stadium on the school campus. A strong bid is to be made for the next Olympic games. Miss Fromme, a senior, was voted the most popular and crowned "The Stadium Girl."

FOR LITTLE CHILDREN EVERYWHERE WE BRING OUR PRECIOUS GIFTS TO THEM A JOYOUS SEASON STILL WE MAKE: EVEN FOR THE DEAR CHILD JESUS' SAKE.

The pressure cooker is one of the first of the labor and fuel saving equipments purchased by many progressive housewives. It can be used to prepare fruits, meats and vegetables for immediate use as well as for canning, and soon pays for itself.—Home Demonstration, O. A. C.

Not all the arsenate eaten by caterpillars feeding on sprayed foliage is assimilated, but part passes through the digestive tracts. Less is lost this way when the acid lead arsenate is used.—Entomology, O. A. C.

Potato storage calls for well ventilated, cool, dry conditions. The best temperature is from 35 to 38 degrees. A more even temperature is maintained in bins having false floors and walls.—Farm Crops, O. A. C.

ning, of pleasant days. Practically all of them used it in stormy weather. The shed itself is simple and inexpensive but offered considerable protection especially from hard winds. Methods of feeding and results of shelter are fully explained in the station bulletin, "Fattening Lambs." Copies free.

Successive Bearing Possible
Although yellow Newtons and Spitzbergers seem to bear on alternate years, proper fertilization with tillage, irrigation and pruning, produced three successive crops in orchards used in farmer-O. A. C. cooperative trials. Continuation of these favorable conditions may bring these varieties into the annual bearing class, the college horticulturists hope.

E. J. Stark is contemplating moving his electrical goods and fixtures to the room now occupied by Roy V. Whiteis, just as soon as Mr. Whiteis vacates, which will be immediately after the first of the year.

SELECTING SITE FOR ROOSEVELT MEMORIAL

The erection of the Roosevelt Memorial, to the memory of the former president, has reached the point of selection of a suitable location. These three men, Wm. B. Thompson, president; Charles Moore, chairman; and Herman Hagedorn, secretary, are members of the Roosevelt Memorial Association. They have just been in Washington trying to decide upon a site for the memorial.

"Perhaps You Don't Know" says the Good Judge

How long a little of the Real Tobacco Chew will last.

Nor how much genuine chewing satisfaction the full, rich real tobacco taste will give.

Ask any man who uses the Real Tobacco Chew. He will tell you that this class of tobacco will give more satisfaction—and at less cost—than the ordinary kind.

Put up in two styles

W-B CUT is a long fine-cut tobacco

RIGHT CUT is a short-cut tobacco
