Five New Hospitals Provided for Soldiers

WILL COST \$13,000,000 AND ONE LOCATED CONVENIENTLY IN EACH SECTION OF U. S.

Washington, Feb. 23—Pursuant to its policy of benefiting the private soldiers who served in the World War, the Republican majority in the House has passed a bill providing for additional hospital and outpatient dispensary facilities for those veterans who are patients of the War Risk Insurance Bureau or the Federal Board for Vocational Training. Under the bill, which went thru by a vote of 220 to 110, a total of \$13,000,000 is authorized for the purchase or lease of existing plants, construction of new ones, and the remodeling of some plants with new equipment.

Five hospital plants of fireproof construction for the treatment of neuropsychiatric and tuberculosis patients are to be located as follows: One in Central Atlantic Coast states, one in the region of the Great Lakes one in the Central Southwestern states, one in the Rocky Mountain states, and one in Southern California. All of them will be as convenient as possible for transportation facilities and for securing expert consulting service.

TROLLEY COLLECTS RURAL MAIL

Mail collections are being speeded up in the rural districts of the east where ever interurban trolley cars operate. A mail box is placed on the side of the car and collections made at each end of the line. Folks living along the route can go to the car line—stop the car and mail their letters.

who favorably reported the bill called attention to the faulty methods of the present Health Service by which an appropriation of several millions more had been asked for because of lack of knowledge of the fact that ten thousand vacant beds in the national soldier homes and some of the Army posts might be available for hospitalization.

"A distinguished statesman in another body has referred to this as a pork barrel bill," said Langley. "It is anything but that, and it was the

express purpose of the committee to avoid that very thing. So, instead of naming the cities or States where these new hospitals should be located, as the Public Health Service recommended, and which would have made it subject to that criticism, the bill designates certain zones within which they are to be located. The bill gives the Secretary of the Treasury the widest possible latitude in locating them. Public buildings and river and harbor improvements should wait while we take care of the hospital needs of the private soldiers who risked their lives and lost their health in making the sacrifice without which this bill might not have been of much service.

DEARTH OF OXYGEN. "The wide-awake student" observes a university man, "occasionally puts a question which the next minute he will regret. In this relation one recalls a story told by a Yale instructor who was lecturing on oxygen.

"Oxygen," he said, "is essential to all animal existence. There could be no life without it. Yet, strange to say, it was discovered only a century ago."

"What did they do, then, sir," a student asked, "before it was discovered?"—*Harper's Magazine.*

TRIALS OF A SCHOOLBOY. Arithmetic, according to the average small boy, was simply invented in order to give teachers a good excuse for punishing their unhappy pupils. And certainly little Tommy Smith found it the unpleasant feature of his young life. "Now, Tommy Smith," said the school-teacher one morning during the usual hour of torture, "what is the half of eight?"

"Which way, teacher?" asked the youngster cautiously. "Which way?" replied the astonished lady. "What do you mean?" "Well, on top or sideways, teacher?" said Tommy. "What difference does that make?" "Why?" Tommy explained, with a pouting air, "half off the top of eight is nought, but half of it sideways is three."—*Houston Post.*

IT WAS POTENT. "How about the bootleg goods in this town?" asked the stranger. "Old particular?" asked the old inhabitant. "It is potent?" "Potent" is the word. A gentleman of my acquaintance stepped out

of a theater one night during an intermission and purchased a few drinks in a nearby alley. Then he returned to the theater.

"Well, what is so remarkable about that?" "He didn't know until the door-keeper kindly told him, that it was the next night."—*Birmingham Age-Herald.*

"What are you little boys quarreling about, my son," asked the father coming in the gate.

"Why, this boy from next door said I was as homely as you, papa," explained the young man.

"Oh! And that's what started the trouble, was it?"

"No, papa, the trouble didn't really start until I said it was a lie."

Back in the dim distant years when the high cost of living was not an ever-present problem and some few things were cheap, James Whitcomb Riley walked into a barber shop at Greenfield for a five-cent shave. The proprietor of the shop was an old negro.

"Well, Sam, how are you getting along?" Mr. Riley asked. "Mr. Jim, I had a very good day," Sam replied. "If I could make seventy-five cents between now and quittin' time I'd have a dollar."

CHEAP

It doesn't take a lot of time Or need a lot of money To grin a little in the grimace. To smile a little sunny. The greatest joys are often free; The ones you buy are dear; In all the world, it seems to me, There's nothing cheap as cheer.

It doesn't take a lot of cash, It only takes a minute. When things have sort of gone to smash,

The day has trouble in it. To just forget your own awhile. Forget your discontent, And give another man a smile— It doesn't cost a cent.

God made his gold a costly prize, The velvets for our lasses— But free the velvet of sunset skies, The velvet of the grasses. It costs a lot for coat and dress, For satins here and there, But not a cent for happiness That all of us can wear.
