"POLLYANNA"

MARY PICKFORD • ©

There are people everywhere who are dragging themselves with all sorts of medicine, who need nothing but a new viewpoint of life, a new comprehension of the power of happiness that is within themselves and in others, a new knowledge of how to find the bright side even under the darkest trial, of how to effect regeneration through words of cheer and encouragement, of how to generate a spirit of resignation, even of gladness, through the thought that sore as the affliction is, hard as is the deprivation, it could have been worse. What they need is the Pollyanna treatment as portrayed by MARY PICKFORD in "POLLYANNA."

In addition to Pollyanna we are going to present BABE RUTH. Everyone has heard of Babe. Here is your chance to see him in action with the New York Yanks and Cleveland Indians in the 1920 games. Also the SLOW MOTION CAMERA will show in clear analysis the swing that made him famous.

Fordson

TRADE MARK

There are many Tractors clamoring for the patronage of the farmer. The very air is charged with the noise of claims. One would think that all the farmer had to do was to buy a Tractor and he would enter into the Millenium.

Well, consider this fact—there are a great many different makers of Tractors. Tractors have been on the American market for twenty years. In that time some three hundred thousand Tractors have been sold to the farmers in the United States. The Fordson Tractor has only been on the market for two years, and in that time more than one hundred thousand Fordson Tractors have been sold to the farmers of the United States.

Two and two make four. Two and two always will make four. If the Fordson Tractor had not delivered more good work, more satisfactory work, more economical work, than any other farm Tractor, it would not have sold in the ratio of anywhere from five and more to one. "The proof of the pudding is in the eating." The proof of the superior merits of the Fordson Tractor is in its larger sale and use.

The Fordson Tractor then asks you to buy it because of what it has done for your neighbors. It asks you to buy it on its merits. It asks you to buy it, Mr. Farmer, because you have used it every day in the year. All the uses for the Fordson Tractor have not yet been uncovered because new places where machine power can take the place of human power, where machine power can supplant horse and mule-power, are being found every week, and wherever such discovery occurs, the Fordson Tractor will fill the bill more satisfactorily than any other form of power.

The Fordson is simple in design, and it is very strongly made of the highest quality of iron and steel. It is the product of the greatest mechanical genius the world has ever known, and it is most economical in first cost and after expense. The Fordson Tractor on your farm will increase the value of every foot of ground in that farm. It will put more dollars and cents into every hour you put into the farm.

Now why not have a Fordson right away? Take up the subject with us. Come in and get the details, and all the particulars. It is only a matter of time until you buy a farm Tractor—that is sure. So don't put it off when it means money to you to act promptly.
