Leo Nicholson left Monday for Seattle, and after spending a few days there, will go on to Montana to find work during the shearing season. Leo was a fine addition to the Heppner ball team and the fans are sorry he had to leave.

The children of the grades in the Heppner schools were taken out by their teachers for a picnic yesterday, going to different points along Willow creek above town, where they enjoyed themselves immensely. The day was ideal—bright, warm and free from wind.

Lou Davidson and his son-in-law, Harlan McCurdy, were visitors in Heppner Tuesday. Mr. McCurdy farms the Davidson ranch, or at least a portion of it, out in the Gooseberry country, where everything is looking up well for an abundant yield of grain the coming harvest.

Mrs. Carrie Vaughn, who has been spending the past three months at Centralia, Wash., where she was ministering to the needs of an invalid brother, arrived home on Saturday to spend a short time. She expects to have to return to Centralia as her brother is no better.

Spencer Akers and family drove over to Goldendale, Wash., the last of the week, spending several days in the Klickitat valley visiting with relatives. They returned home Monday evening. Mr. Akers states that the weather conditions have been unfavorable to the growing crops over there this spring, and as a result grain is far behind what it is in Morrow county and does not look nearly so well.

J. H. Jackson was in from his farm in the Lexington section Tuesday and reports that the grain on the Jackson place is coming along just fine. There will be nothing to it, according to Mr. Jackson, if the farmer succeeds in getting a fairly decent price for his grain this fall. He will soon forget all that has happened to him during the past year. Just at present Mr. Jackson is suffering from a severe attack of rheumatism and thinks he will have to take a trip to the hot springs to get relief.

The Grand Canyon
of the Colorado

Here is an unparalleled spectacle—a sight never to be forgotten—one of nature's most stupendous wonders.

The Grand Canyon is about 250 miles long—with a width at the top varying from 5 to 12 miles. At some places it descends to a depth of a mile below the plateau surface. Its best effect, as revealed by extreme depth and brilliancy of coloring, is from a point opposite the Kaibab Plateau—about 65 miles northwest of Flagstaff, Arizona.

Motor roads lead to the Grand Canyon through Ashfork, Williams and Flagstaff, Arizona—and all the way you can get "Red Crown," the all-refinery gasoline.

You'll be glad if you make your Grand Canyon trip a "Red Crown" trip.

Look for the "Red Crown" sign on service stations and garages.

Which Paint
Costs Less?

NOTE how the best paint spreads easier and covers more square yards than cheap paint does.

Figure in the extra gallons of cheap paint that you must buy and the extra cost of application.

It means that cheap paint costs just as much as good paint on the house.

The best paint then gives five or more years' protection to your property investment. Cheap paint on the average, starts cracking in twelve months. Which paint costs less?

72 Years' Experience

The house paints we specify for your home are the result of 72 years' experience in making paints and varnishes for every

purpose. Made to stand the peculiarities of western weather.

The best material—PIONEER WHITE LEAD, pure linseed oil, zinc and color—are combined with long-time skill, in scientifically exact proportions.

Our white lead base must pass through a silk screen with 40,000 meshes to the square inch. A patented purifier makes it "whiter," so Fuller paints are exceptionally clear-toned. The paint when finished and applied on the house is a beautiful, elastic, tough, protective coating.

Such paint costs but a trifle more to buy per gallon and is five to ten times more economical in service.

Don't allow surfaces to rot. It costs less to paint them.

Real Printing Service

SERVICE that is not based upon price alone, but upon the requirements and desires of each individual customer.

SERVICE that demands that each job be the best it is possible to give for the purpose it is supposed to serve.

SERVICE that is possible because it is backed up by a REAL printing plant—not a collection of worn-out, obsolete machinery and type—a plant completely equipped with modern machinery, each machine the best possible to procure for the work which it is intended to perform, and the latest faces of new type.

SERVICE at a price no greater than that of the ordinary brand of country printing. The price of G-T. printing is based upon the Franklin Printing Price List, the one-price-everything-marked-in-plain-figures idea applied to printing, and insures a square deal to the customer as well as the printer. It is used in over 10,000 printing plants all over the United States.
