

LOCAL HAPPENINGS

E. Jay Merrill and Pete Proghat were Heppner visitors from Hardman on Monday.

WANTED—Job as separator tender; seven years experience. Inquire at this office.—Adv.

Guy Huston and family of Eight Mile were visitors in Heppner on Tuesday. They will soon be busy with the harvest work.

Roy Campbell of Social Ridge will begin his harvesting today, according to statement made this paper while in town Tuesday. He will reap a heavy yield of grain.

Miss Helen McNary of Portland, is visiting her friend, Miss Dorothy Hill of this city. She expects to be a guest at the home of Mr. and Mrs. Gene Penland for the remainder of the summer.

Rev. Thomas E. Elliott, D. R., of Portland, will preach at the Federated church next Sunday morning at 11 o'clock. He will preach at the Fair ground park Sunday evening at 7 o'clock.

Mrs. W. A. Richardson departed for Portland on Sunday to be absent during the week as a delegate to the eighth quadrennial convention of Neighbors of Woodcraft now in session there.

Geo. Peck, young farmer of the Lexington country, was in town Monday. He is just ready to get into his big fields of wheat with the harvester and promises to be a busy man for the next couple of months.

WILL TRADE FOR SHEEP—1 ton truck; 1200.00 business building rented, \$15; 56 acres alfalfa land, unimproved, \$2800.00; note secured by mortgage, \$1500; some small notes. Any or all. E. P. DODD, Hermiston, Oregon. Adv.

Mrs. Wm. Becholdt and son Adrian are visiting with Mr. Becholdt here from their home at Walla Walla. Mr. Becholdt has a position with his teams on the Willow creek highway, and in fact has spent the past spring and winter in doing road work in this country.

Wm. Tucker of Blackhorse is getting into his wheat fields with the harvester this week. Having one of the best prospects in the entire country, we are anxiously awaiting the results of his threshing in order to give amount of yield per acre. We venture it will not be far short of forty bushels from all reports.

Frank L. Christenson, who recently disposed of his pharmacy business in Ione to W. E. Bullard, has been spending several days in Heppner, visiting at the home of Dr. and Mrs. C. C. Chick. Mr. Christenson will take a much needed vacation and look around for a while before settling down in business again.

Word received from O. E. Adkins this week is to the effect that he will go on the operating table at Mayo Bros, Rochester, Minn., for the removal of ulcers of the stomach, and it is expected that as soon as he regains strength from this operation, another will be performed for the removal of an intestinal cancer.

Mrs. Chas. H. Curtis, who is spending several weeks visiting at the home of her mother, Mrs. W. W. Smead, in this city, and who for several years past has been residing at Marshfield, Oregon, expects to join her husband shortly at their new home in Stockton, Calif. Mr. Curtis is now located there and has a position as manager of the Stockton branch of the Western Meat Co.

The Chautauqua will open at 3 o'clock, Thursday afternoon, July 21, in the big tent. Everything indicates that

everyone of the twelve good programs will be first class. Make your arrangements to attend every session, if possible. Buy a season ticket. The three big programs will cost more than a season ticket. If you pay the single admission rates, if you can attend only the evening sessions, it will pay to buy a season ticket, for the single admission for the evening programs amount to \$4.40, while the season tickets are only \$2.75 for adults and \$1.10 for children. Back up the local committee by purchasing season tickets.

Len McCabe, who is one of the leading farmers south of Ione, was in town a short time yesterday. He has started his hender and harvest will proceed at a steady rate on his farm until the grain has all been gathered in. Barrening a small field of spring sown grain, Mr. McCabe will have a splendid yield of wheat. The spring sown grain was somewhat shortened by the recent hot weather.

Dr. Bruer, partner of E. M. Huldén, extensive farmer of the Blackhorse section, was up from Portland during the week and taking a look at the fine prospects on his Morrow county holdings. While here, Dr. Bruer was given a ride over the most of the wheat-producing portion of the county and he got an estimate of the vast yield of grain that will go into the sack here this season.

Mr. and Mrs. W. E. Cummings, who formerly lived here and were extensively engaged in farming, but who make their home at Portland, arrived at Heppner the last of the week and expect to spend the remainder of the summer here. They are well pleased with the home they have in the Willamette valley, and they also rejoice over the splendid crop conditions prevailing here.

The local committee realizes that the dates for the Chautauque this year are inconvenient for the people living in the country. However, it seemed impossible to get the dates changed. Quite a large number of the country people are planning to attend some of

the evening sessions. Nearly all can attend the session on Saturday evening and both programs on Sunday. Harvest crews will be welcome even if they do not have time to change clothes as they would like to do. No one is doing a more worthy work than those who are gathering in the golden grain, and no one will be more welcome at the Chautauque than the harvest crews. So, if you can come in after the day's work is over, jump into the auto and come as often as you can.

Chas. O. Conner was in Heppner on Saturday, looking after some business matters. He was just about ready to begin the harvesting of his 500 acres of grain on the Conner farm on the west side of Morrow county, and reports that he will have a splendid yield of good grain, expecting to get at least 30 bushels per acre. A number of combines are already at work in this vicinity and dropping 15 to 14 sacks to the acre.

Mrs. J. G. Jackson, of Newberg, mother of Mrs. A. C. Crowell of this city, arrived on Friday and will visit here for a few weeks. She was accompanied by Beril Crowell, daughter of Mr. and Mrs. Crowell, who has been at Newberg with her grandmother for the past year. The little girl was taken below suffering from the effects of a severe attack of inflammatory rheumatism and has been under the care of physicians who have been treating her for valvular leakage of the heart and she is now somewhat improved and may be able to remain here for a short time to enjoy a visit with her parents and her many little school friends.

Forest Ranger Woods of Gurdane

district was in Heppner Tuesday, in company with Ranger Langdon he was preparing to go over the telephone line up Willow creek. He reports six fires in the forest at present, five of them in state territory and one in the national domain. The state forest being lower than the national, fires out quicker and consequently gets the jump on fires. This being the camping season, it is necessary that extra precaution be taken by all in the matter of fires and the forest officials will appreciate the co-operation of all those who are visiting the mountains at this time of year. Mr. Woods contemplates moving his family to Heppner this fall that they may be able to take advantage of our school facilities.

FEDERATED CHURCH.
Regular services as usual on next Sunday. In the morning at 9:45 the Sunday school will meet, and there is

a class for each member of the family. At 11:30 o'clock, regular preaching services. Union service in evening at Fair grounds.
A welcome awaits you at all these services.
E. L. MOORE, Pastor.

NOTICE

AUTO REPAIR WORK

After June 10th I will open a repair shop one block east of Patrick Hotel. Owing to the cheaper rent I have to pay on the back street, I am prepared to do cheaper car repairing. See me for estimates on your work. Fords a specialty.

**Shoes Wear Out—
So Do
Batteries!**

When a pair of shoes wear out you have been notified in advance by the thinness of soles or cracking of the uppers—or some other easily recognized sign.

But when a battery wears out you may be taken by surprise, because batteries often go strong until the last minute.

The way—and the only way—to cut trouble and worry and cost to the limit is to buy the best battery—the Willard Threaded Rubber Battery. Its Threaded Rubber Insulation gives you the most miles of uninterrupted service per dollar.

WHAT APPROXIMATELY \$700,000,000 is required by the public utility companies of the country to provide service for an additional million inhabitants is one of the interesting facts brought forth in the recently published report of Senator William M. Calder's Committee on Reconstruction and Production.

After a searching inquiry into the various conditions bearing upon the housing situation and the country's industrial production, the Committee finds that the business of public utilities has outgrown their plant facilities owing to the inability of the companies to finance improvements and additions necessary to take care of increased service demands.

"Prior to the war," states the Committee, "it is estimated that the normal annual requirements of electric railway, gas, and electric light and power companies for extensions, betterments, and improvements was about \$500,000,000, proportioned as follows: electric railways, \$250,000,000; gas companies, \$125,000,000; electric light and power companies, \$125,000,000.

The Committee has informed that for four years not over 40 per cent of such betterments has been made, leaving an accumulation of about \$1,200,000,000. If to this sum is added the \$700,000,000 required alone for service to new residential buildings held in abeyance, a total of approximately \$2,000,000,000 seems necessary for the public utility program in the immediate future.

"The question of placing these businesses on a sound financial basis in order that credit may flow to them is the same question which confronts steam railroads and housing, but in the case of public utilities the situation is more difficult because there is no central body as now provided in the case of steam railroads which might adjust rates in proper relation to operating costs and capital investment. The utilities likewise suffer in their effort to secure new capital for necessary extensions of service by the almost insurmountable difficulty of having to compete for such capital with municipal, state and similar tax-exempt securities. Until these problems are solved the public should recognize this underlying reason for much of the faulty service and for the failure to provide the additional facilities urgently demanded to meet community needs."—PAID ADV.
