FIRE PREVENTION DAY PROCLAIMED, OCT. 9

Campaign of Education Launched From
State Fire Marshal's Office—Schools
Called Upon in Particular to Observe
the Day.

From the office of the State Fire Marshal is sent out the Fire Marshal's Bulletin, under date of September 25, 1921, which contains the proclamation of Governor Olcott setting aside the 9th day of October as Fire Prevention Day as follows:

Fire is the State of Oregon is attended with very grave consequences. More than two million dollars' worth of factories, stores, dwellings, buildings and other property were destroyed during the year 1920, and in addition many thousands of dollars' worth of merchandise. The tax for fire insurance for the year to the sum of \$2.75 per capita.

This property loss is even surpassed in awfulness by the wanton loss of life, the injury and the suffering inflicted upon innocent victims of fire. During the past year thirty-six people burned to death and hundreds were injured to a greater or lesser extent by the fire fiend.

It is an established fact that ninety per cent of the fires are the result of preventable causes, and that, by proper exercise of care and prudence by every person, they could be prevented to a large measure.

In order that our lives may be better protected and our general welfare promoted, I, BEN W. OLCOTT, GOVERNOR OF THE STATE OF OREGON, do hereby proclaim the NINTH DAY OF OCTOBER, 1921, AS FIRE PREVENTION DAY, and suggest that on or before that day every person in the state of Oregon give most serious attention to the prevention of careless fires.

Let everything possible in an educational way be done, because only through education is there a permanent relief from this self-imposed scourge.

Given by me and the great seal of the State of Oregon, at the State House at Salem, this fifth day of September, in the year of our Lord one thousand nine hundred and twenty-one.

SEAL BEN W. OLCOTT, Governor.
By the Governor,
SAM A. KOEHL, Secretary of State.

From the same issue of the Fire Marshal's Bulletin, we take the following article, which will be of interest and benefit in the observance of the foregoing proclamation of the Governor:

FIRE PREVENTION DAY What It Is

One day each year has been set aside for the past several years as a day when concerted efforts shall be made throughout the nation to bring to the attention of the public the terrible monotony of fire in its destructive element.

October 9, 1921, has been set aside for Fire Prevention Day this year. Fifty years ago on that day the second largest city in the United States was wiped off the map by fire with a loss of 200 lives. It is a fitting memorial to that catastrophe that on this day efforts shall be made to prevent such future carelessness as caused that fire.

True, fire prevention can not be learned in a day. It necessitates changing the careless habits of the entire nation. On Fire Prevention day, however, we sincerely hope that the great, careless American public can be awakened to the crying need for fire prevention.

Education

When efforts were first made in the attempt to reduce the nation's fire loss propaganda was scattered far and wide as the only means of reaching the public. Fire losses continued to increase. State organizations were perfected, but with no appreciable reduction of losses.

After a careful analysis, evidence leads to the conclusion that the careless habits of the American people were too well grounded in their lives to permit of possible correction. The possibility of the school loomed up as being the last trench in which to make the fight wherein efforts could be made to mold the habits of the impressionable young and coming generation.

Systematic fire prevention study has been instituted in the public schools of Oregon. Talks before the school children have been made by members of the State Fire Marshal Department, which practice will continue.

Fire Prevention day should be the beginning. Create the impressions on that day and awaken interest in the detailed instructions to follow later in the year.

Material
Realizing that frequently the teachers themselves have no available information upon which to base their talks, material is herein submitted as a suggestion which will have to be adapted to the individual needs.

Losses are quoted in terms of dollars for the benefit of the teachers, yet few of us let alone the children, comprehend what a million dollars represents. For this reason, if possible, values should be reduced to some form which the children will comprehend.

Facts
During the year 1920, the loss by fire in the United States was approximately \$500,000,000. If we could divert this money we could build a Panama canal every year and still have enough money left over to build about 3,000 fireproof school buildings.

If the fire losses were divided so each man, woman and child would have to pay his equal share, each would have to pay about \$250 a year, while the people of Europe would only have to pay about 50 cents a year.

It requires about 24 hours of travel by train to cover the distance between New York City and Chicago. Yet if all the buildings consumed in a year were placed on lots of 60 foot frontage, they would line both sides of a street extending the entire distance from New York to Chicago. Every thousand feet of this street would have a run from

LOCAL NEWS HAPPENINGS

Cashier W. O. Hill of the Lexington State Bank was doing business in this city on Monday evening.

Bert Kramer was over from Top, Ore. This week with another load of potatoes which he disposed of to Heppner people.

S. E. Norton was called to Portland on business last Friday and spent Saturday in the city, returning home the first of the week.

I have grapes for sale. Tokays, Muscades and Rose of Peru; 50 per pound. Salway peaches \$1 and \$1.25 per box. A. E. ANDERSON, R. 1, The Dalles, Or.

Jack Young, who spent ten days at Heppner looking after his business interests, departed for his home in the Willamette valley on Tuesday morning.

A son was born to Mr. and Mrs. Clinton Sharp at their country home east of Heppner on Tuesday Sept. 27; weight 9 1/2 pounds. Dr. McMurdo reports all doing well.

Mr. and Mrs. Bub Clark have returned from their automobile journey of several weeks, which took them as far south as the Mexican border in California. They report a very enjoyable time.

Word received by relatives here announces the very serious illness of Mrs. Mary D. McHaley at her home in Portland. She has suffered several very severe hemorrhages of the lungs and the fear is expressed that she cannot recover.

Ray Young is advertising to hold a big sale of his farm equipment and stock at the Heppner place. Heppner Flat, on Saturday, October 14th. Look up his ad in another column. You may find something listed there that you will want to buy.

LOST—Saturday, Sept. 17th, somewhere in Heppner, a State of Oregon Special Agent star No. 126. Finder will please return it to this office and get reward. Anyone willfully having this star in their possession after this notice is subject to heavy fine by the State of Oregon.—Adv.

SHERIFF MCDUFFEE ADDS ANOTHER TO COLLECTION

Sheriff McDuffee has added another still to his growing collection at the court house, together with an additional supply of booties.

On Monday night accompanied by deputies T. E. Chidsey and F. B. Brown, the sheriff went out to the Butter creek ranch of W. E. Straight where he arrested Mr. Straight and Dave Pringle and captured a lot of newly distilled liquor along with the manufacturing plant. The men were brought to town with the evidence, and on Wednesday they were taken before Judge Cornett, who assessed them each a fine of \$300 and costs. We understand that Mr. Straight has paid his fine, but Mr. Pringle is still residing in the county jail and may decide to "sit" out his assessment.

which an "injured" person was taken. Every three-quarters mile would be found the charred remains of a human being.

It has been estimated that in the United States there are burned on an average every week ten schools, two college buildings and three public halls. On the morning of March 4, 1908, a fire occurred in the basement of the Lakeview Grammar school, Collinswood, Ohio. The students in all rooms but one room got beyond the control of their teacher and rushed down the nearest stairway. A jam occurred at the exit which was overtaken by fire before the children could be evacuated. The charred bodies of 113 children and two teachers were eventually taken out of that building.

On the morning of October 25, 1912, just as classes were opened, a fire occurred in the basement of St. John's Parochial school, Peabody, Mass. Fire drill was sounded and the children began their orderly march down the stairs. One child stumbled and fell. Nineteen charred little bodies were found in a heap at the door. Three more died later.

At least three-fourths of it was pure carelessness from which no one is exempt, whether they be parents, teachers or children.

It becomes necessary to tax the people of the state of Oregon to defray the expenses of the 1925 World's Fair. It is proposed to raise \$2,000,000 in this state outside of Portland. Yet this same state every year is destroying by fire practically a like amount.

Suggestions.
Inasmuch as Fire Prevention day this year falls on Sunday, it is considered indispensable that the schools of the state hold special exercises on the Friday preceding that day. Consult with the chief of the local fire department with regard to a talk from some member of the fire department. Have compositions prepared on such subjects as:

"What use this school could make of the money lost by fire in this city."

"What I have learned about Fire Prevention day and why we have it."

"How can I help in the reduction of loss of life and property?"

Especially in the high school departmental exhibits should be prepared. Each could show the special hazards they provide. The manual training department, domestic science, chemistry, and physics departments all have their special hazards, which should be watched. Members of the fire department and fire insurance agents will be able to give valuable aid in this work.

Above all, let the children use their imagination and take as much active part in the exercises as in practical. It arouses interest and enthusiasm otherwise impossible.

Remembering lastly that Fire Prevention day is NOT a day to CELEBRATE fire losses, but a day on which interest should be aroused in the REDUCTION OF FIRE LOSSES.

TWO EX-SERVICE MEN GO TO BOISE HOSPITAL

As one result of the visit to Heppner the past week of the Clean-Up Squad, two ex-service men from this section will go to the government hospital at Boise, Idaho, where they will be cared for at the expense of the war department. These are Robert J. Buschke of Heppner and Perry Teague of Eight Mile.

Mr. Buschke has been a sufferer ever since returning from the war and it is thought that it will take at least two years of treatment at the hospital to restore him to health. He and Mrs. Dueschke left for Boise on Wednesday, and he will at once enter Public Health Hospital No. 12. The government will pay a sufficient maintenance fee for Mr. Buschke and his wife, besides his treatment at the hospital will be free.

Mr. Teague, whom it was found was a sufferer from tuberculosis, will be cared for at the same hospital, and he left for Boise on Tuesday.

There was some disappointment on the part of the Clean-Up squad that none of the ex-service men did not appear before them at Heppner and pass the examination. The government is seeking out all those who are in any way entitled to receive aid and they had hoped that the discharged soldiers would look them up while here, rather than to have to be hunted up, which is the case, as the squad had to go on to other points.

The squad who visited Heppner on Monday were Dr. Birchfield medical officer; Cliff Wood, compensation and insurance claims contact examiner, and Keith Kiggins, Red Cross representative.

Miss Irene Holmes, of Seattle, representing the Northwest Division of the Red Cross, is here to work in conjunction with the local Red Cross chapter and will remain in the city for several days, having her headquarters in the Hotel Patrick. Miss Holmes has been given charge of the unfinished work of the squad and is prepared to assist in making out all papers that may be required of ex-service men in their applications for compensation, insurance, etc., and will continue the work of looking up all who are entitled to assistance. The Red Cross has carried on an extensive line of work independent of the government in aid of the ex-soldier, and is continuing this work. However, Miss Holmes will be able also to assist with the government work, should she may be communicated with personally or by phone at Hotel Patrick.

Here's Your Land Snap.

If taken within the next 30 days: 1000 acres of pure wheat land, rich soil, in the center of Morrow county best wheat belt, all but ten acres under cultivation. Five miles from elevator, down hill pull, great well of water, piped to house and barn, good improvements 400 acres of clean, deep-plowed summer-fallow, all ready to seed. Price, including summerfallow, \$30 per acre. \$5000 or \$6000 cash down would handle it. Absolutely no better land snap in the United States. Over \$15,000 worth of wheat produced from three quarters of this land in one season. See me at once.

E. M. SHUTT

P-T. Association to Meet.

The regular meeting of the Patron-Teachers Association will be held at 8:30 p. m. on Tuesday, Oct. 4th, in the high school auditorium. All members and friends are urged to attend.

MRS. LLOYD HUTCHINSON, Sec.

FIRST CHRISTIAN CHURCH.

Lord's Day, October 2.

Did you send your children to Sunday School last Sunday? You answer, yes. Well, it was wrong. You should have taken them. There's a vertebra missing in a man's spiritual spinal cord when he can't point to himself as a fair example for his children to follow. And say, how much strength is there in a back bone with a joint gone? Come and bring the whole family to church next Lord's Day. It will do as all good, Bible School at 10 o'clock. Communion and Preaching at 11. Christian Endeavor at 6:30 and Song Service and Preaching at 7:30. Don't overlook Rally Day, October 9. Let's rally rally.

LIVINGSTON.

HIGHWAY ENGINEER WILL LEAVE HEPPNER

L. R. Grey, engineer for the State Highway Commission in charge of the grading work on the Willow creek highway, and who has had his headquarters at Heppner for the past several months, expects to leave Heppner just as soon as the present contracts of grading on the units between Lexington and Jones hill have been completed. Just where he will go is not yet known, but he will doubtless have charge of work in some other part of the state for the highway commission. Before coming to Heppner, Mr. Grey was in charge of a part of the work on the Columbia Highway with headquarters at The Dalles. He is very efficient in his line and has won a place in the hearts of Heppner people by his expedition and Jones hill have been completed. Just where he will go is not yet known, but he will doubtless have charge of work in some other part of the state for the highway commission. Before coming to Heppner, Mr. Grey was in charge of a part of the work on the Columbia Highway with headquarters at The Dalles. He is very efficient in his line and has won a place in the hearts of Heppner people by his expedition and Jones hill have been completed. Just where he will go is not yet known, but he will doubtless have charge of work in some other part of the state for the highway commission.
