LIST YOUR LAND NOW

Those who have Wheat Farms, Alfalfa and Stock Ranches for sale should call at my office and list the same at once, so as to get in on the fall and winter demand. I have sold a couple of big wheat ranches just lately, and I have prospects who are looking for others. Wheat ranches especially are going to be in demand this fall and next spring.

IF YOU REALLY WANT TO SELL you must be prepared to ask considerably less for your land than it was held at during and immediately following the war, when wheat and other farm products brought high prices. Regret this as we may, those changed conditions exist, and the farms that change hands the next year or so are the ones in which the buyer can see a bargain, or at least good value. My exclusive time will be devoted to the real estate business, and business entrusted to me will receive prompt and efficient attention.

THAT APPROXIMATELY \$700,000,000 is required by the public utility companies of the country to provide service for an additional million inhabitants is one of the interesting facts brought forth in the recently published report of Senator William M. Calder's Committee on Reconstruction and Production.

After a searching inquiry into the various conditions bearing upon the housing situation and the country's industrial production, the Committee finds that the business of public utilities has outgrown their plant facilities owing to the inability of the companies to finance improvements and additions necessary to take care of increased service demands.

"Prior to the war," states the Committee, "it is estimated that the normal annual requirements of electric railway, gas, and electric light and power companies for extensions, betterments, and improvements was about \$500,000,000, proportioned as follows: electric railways, \$250,000,000; gas companies, \$125,000,000; electric light and power companies, \$125,000,000.

The Committee has informed that for four years not over 40 per cent of such betterments has been made, leaving an accumulation of about \$1,200,000,000. If to this sum is added the \$700,000,000 required alone for service to new residential buildings held in abeyance, a total of approximately \$2,000,000,000 seems necessary for the public utility program in the immediate future.

"The question of placing these businesses on a sound financial basis in order that credit may flow to them is the same question which confronts steam railroads and housing, but in the case of public utilities the situation is more difficult because there is no central body as now provided in the case of steam railroads which might adjust rates in proper relation to operating costs and capital investment. The utilities likewise suffer in their effort to secure new capital for necessary extensions of service by the almost insurmountable difficulty of having to compete for such capital with municipal, state and similar tax-exempt securities. Until these problems are solved the public should recognize this underlying reason for much of the faulty service and for the failure to provide the additional facilities urgently demanded to meet community needs."—PAID ADV.
