

\$10,000,000 FOR NEW FREIGHT CARS

Union Pacific System Will
Build Them All With Lumber
From Northwest Mills.

The Union Pacific system will expend, immediately nearly \$10,000,000 for increased freight car equipment, according to announcement yesterday through the local offices. This is among the first announcements of railway expenditures that is of importance to the Pacific northwest.

The contracts which require the expenditure of the money call for the building of 4500 new freight cars for delivery the first six months of this year. The contracts require the use of lumber from this territory to enter into the construction of the cars. Several million feet of fir lumber will be used in building the cars. The railway officials have specified that the car builders who will erect them in the east obtain this lumber from mills on the Union Pacific line in this section.

Of the 4500 cars, 2000 will be double-sheathed 40-foot, 50-ton box cars; 1500 will be special double-sheathed 40-foot, 50-ton automobile cars for general service, including movement of grain in bulk, and 1000 are to be steel 50-foot, 50-ton automobile cars suitable also for general freight service.

The building of the special cars for the carrying of bulk grain will be of great benefit to the grain shippers of this section. These cars will be tight and moisture proof. It is planned to keep them in service for shuttle service back and forth from grain-loading stations to railroad terminal and shipping points at the time of year when grain is moving in its greatest bulk.

HEPPNER HI LIFE

(Continued from First Page.)

the recreation after the exams by having a theater party and making Maxwell's a visit afterwards, Friday evening. This was a "dutch treat," as the girls felt sorry for the three boys in the class. Everyone went home at an early hour saying they had a very enjoyable time.

The Senior class embarked on the long voyage of "Civics" this week after a breezy course on the "Sea of American History," which lasted all last semester. The next landing place is "Point Graduation."

The framed pictures which were bought from the Elson Art Company as a result of the art exhibit held last fall by the Patron-Teachers' Association, are being shipped by freight from Boston, according to Mrs. Frank Turner who has just received the bill of lading from the art company.

The physics class spent part of their Monday class period in repairing broken folding chairs of which a great number had accumulated. The class is thinking of opening a shop down town, in which they will repair broken furniture, as they feel that they have become experts at the job in one morning.

Another new student! But since the examinations there is no longer such a scarcity of room. Leola Bennett, who has just recently returned from Wyoming began the new semester with us last Wednesday.

A Sophomore class meeting was held last Tuesday for the purpose of electing class officers for the second semester. Those elected were: Fay Ritchie, president; Carl Cason, vice-president; Violet Hynd, secretary; Dorothy Anderson, treasurer, and James Clabough, sergeant-at-arms.

A meeting of all the boys interested in basketball was held last Tuesday and Raymond Ferguson was elected manager of the team.

Students in nearby classrooms were much relieved when they learned that the groans and noises heard in the Latin classroom Monday was merely the class rehearsing a song for their play "A Roman School."

Mr. and Mrs. Clarke Stephens of Hardman were made happy by the arrival at their home on January 13th of an 8-pound daughter.

RODENTS MUST BE CONTROLLED.

Pursuant to authority given in Chapter 121 of the 1919 Session laws of the State of Oregon, the Morrow County Court has instructed the County Agent to serve notice to the parties owning, leasing, possessing, or having charge of or dominion over land infested with jack rabbits, that steps must be taken immediately to exterminate the same under supervision of the County Agent.

Procedure will be as follows:

1. Poison will be furnished as long as funds voted for that purpose are available.

2. Each individual will be required to provide proper bait, treat, put same out on lands he owns or controls, which are infested with rabbits.

3. Poison will be placed in the hands of the committeemen in areas that are infested from where it can be secured. It is also available at the office of the County Agent.

4. Prepare poison baits as follows: Dissolve one ounce sulphate strychnine in one gallon of boiling water and sprinkle on 10 to 12 pounds of alfalfa leaves, chopped alfalfa, last cutting of alfalfa hay, wheat or rye heads, or short cuttings. Stir the bait constantly so that all will become thoroughly dampened.

5. Put out in the trails in the canyons where the rabbits are congregating while sheep are off the range. When the sheep are on the range the pens can be used. These must be prebaited however before putting out the poison, to get the rabbits accustomed to feeding there, otherwise the pens are absolutely valueless and the poison put in them practically wasted.

6. In the wheat growing sections the wheat headings are much more effective than any other bait. Alfalfa is best in alfalfa growing sections.

7. Poison put out by parties on land which they own or control need not endanger stock which will later be pastured on that range, providing it is scattered properly. Don't pile it up. Put out a few straws or heads in a place. If put out in piles you can take up what is left before stock are turned out. The strychnine sulphate is soluble in water and is washed off into the ground with the rain that usually comes about the time the snow leaves, providing the bait is not put out in piles.

8. In places where drives can be organized successfully of other means put into effect for immediate control of the pest, they can be substituted for poison.

9. The law provides that every man shall proceed to act promptly and that this announcement published in the newspapers gives sufficient notice. The law also provides that unless the holdings are rid of the pest, that the Court shall hire that work done and the expense will be assessed to the individuals and collected in the manner taxes are collected. The law is not designed to and will not work hardships on any man who attempts to comply with its provisions. Because of the great damage done by these rodents, the Court deem it imperative that concerted action be taken and it is expected that every individual owning or occupying land infested with jack rabbits will comply promptly to the end that these rodents may be controlled and exterminated while conditions are favorable. Ground squirrels will also come under the provision of this act and action expected in season.

Published by order of the County Court of Morrow County, Oregon, on January 5, 1922.

Friday: "Prayer, Its Place and Power."

Saturday: "Behold the Man."

Sunday, A. M.: "The Lord's Supper."

Sunday, P. M.: "What is the Gospel?"

Every Night Except Monday

Almost everybody likes sweet corn and when the right seed is selected and the right variety settled on, it is a comparatively easy matter for the man or woman with a bit of ground to satisfy their needs from their own gardens. A book that deals most helpfully with the selection of varieties has just recently been published and should be obtained by every one interested in corn.

The new book referred to is Lilly's 1922 Seed Annual. Each year Lilly's—Western America's Greatest Seed House—has been issuing an annual dealing with vegetable and flower seeds, etc., and, as this firm has been carrying on a successful, and growing business for 25 years or more here in the Northwest, the information it has to give today is worth much to gardeners.

Because of the distinctive climatic conditions in the Pacific Northwest, corn has to be selected for planting with great care and special pains must be taken with it if one expects to get a good yield. For years Lilly's have studied the problem of growing the best varieties of corn for this climate and their suggestions are most valuable.

Roasting ears are no longer a problem to the man equipped with this information because big, juicy ears can be raised in almost all parts of this region if proper care is taken in choosing the right varieties of seed and planting it in soil suitably prepared.

The new Annual tells fully about the best varieties of corn and how to cultivate them for best results. It also gives a great deal of reliable information about practically every other vegetable that can be produced here advantageously. Sections are devoted to flower seeds and cultivation, fertilizers, sprays, poultry and bee supplies, etc.

All together this new annual is a book that every person who gardens ought to have. You can get a copy free from your dealer, or by writing to The Chas. H. Lilly Co., Seattle, Portland, or Yakima.
