

### MISNER THINKS FARMING BEATS TRAVLING

(O. A. C. Extension Service News.)

Dwight Misner, Morrow county, used to be a traveling salesman. His company sent him out to Morrow county once to look over some farm property. After he had viewed the country and the opportunities there the idea of becoming a farmer himself developed rapidly, and shortly he returned to the county and purchased 1440 acres. That was in the fall of 1917. Now he is farming 3500 acres, having half in crop and the other half in summer fallow. The neighbors shook their heads when Mr. Misner bought in Morrow county, because he went out to the northern edge of the county on land which old-timers said would not grow wheat. The land he purchased was valued at \$15.00 an acre. His land now, and that in his vicinity, is valued at \$30.00. This increase is due to the results that Mr. Misner has secured from up-to-date dry farming.

#### CONSULTED MORO STATION.

One of the first things he did was to go over to the Moro station and study the results there. He found, for instance, that if he did not get his summer fallow plowed early he might just as well save his time and money and not plow at all. He learned that it would not make him any money to harrow in wheat in the spring; that Turkey Red was the best winter wheat, and many other valuable pointers. Under his up-to-date system of dry farming he obtained between 18 and 20 bushels an acre last year, and his place is considered good for 15 bushels on the average year in and year out.

#### DEVELOPED HIS COMMUNITY.

Not only has Mr. Misner done well for himself but he has assisted in developing the entire neighborhood in which he lives, first, by his demonstration that much land bordering on the line between success and failure could be thrown into the "success" side of the scales by proper methods; and second, by helping the community by his leadership in all progressive affairs.

## BIG POWER for BIG AUTOMOBILES

You selected your car carefully for quality. Select your motor fuel the same way. It's unfair to feed a good car an inferior gasoline.

"Red Crown" answers completely the automotive engineer's demand for a motor fuel that will vaporize rapidly and uniformly in the carburetor and explode cleanly in the cylinders. All the heat units it contains are converted into power at the drive wheels.

"Red Crown" is uniform in quality—every gallon is the same, wherever and whenever you buy it.

Fill at the Red Crown sign—at Service Stations, at garages, or other dealers.
